

PROSPECTUS

June 30, 2020

MONDRIAN GLOBAL EQUITY VALUE FUND (Ticker Symbol: MPGVB)

INVESTMENT ADVISER: MONDRIAN INVESTMENT PARTNERS LIMITED

The U.S. Securities and Exchange Commission has not approved or disapproved these securities or passed upon the adequacy or accuracy of this prospectus. Any representation to the contrary is a criminal offense.

Beginning on March 1, 2021, as permitted by regulations adopted by the Securities and Exchange Commission, paper copies of the Fund's shareholder reports will no longer be sent by mail, unless you specifically request paper copies of the reports from the Fund or from your financial intermediary, such as a broker-dealer or bank. Instead, the reports will be made available on a website, and you will be notified by mail each time a report is posted and provided with a website link to access the report.

If you already elected to receive shareholder reports electronically, you will not be affected by this change and you need not take any action. You may elect to receive shareholder reports and other communications from the Fund electronically by contacting your financial intermediary or, if you are a direct investor, by calling 888-832-4386.

You may elect to receive all future reports in paper free of charge. If you invest through a financial intermediary, you can follow the instructions provided below for direct investors, or you can contact your financial intermediary to inform it that you wish to continue receiving paper copies of your shareholder reports. If you invest directly with the Fund, you can inform the Fund that you wish to continue receiving paper copies of your shareholder reports by calling 888-832-4386. Your election to receive reports in paper will apply to all funds held with your financial intermediary if you invest through a financial intermediary or all funds in the Gallery Trust if you invest directly with the Fund.

MONDRIAN GLOBAL EQUITY VALUE FUND

Investment Objective

The Mondrian Global Equity Value Fund (the “Fund”) seeks long-term total return.

Fund Fees and Expenses

This table describes the fees and expenses that you may pay if you buy and hold shares of the Fund. You may be required to pay commissions and/or other forms of compensation to a broker for transactions in shares, which are not reflected in the table or the example below.

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)

Management Fees	0.65%
Other Expenses ¹	<u>2.79%</u>
Total Annual Fund Operating Expenses	3.44%
Less Fee Reductions and/or Expense Reimbursements ²	<u>(2.70)%</u>
Total Annual Fund Operating Expenses After Fee Reductions and/or Expense Reimbursements	0.74%

¹ Other Expenses are based on estimated amounts for the current fiscal year.

² Mondrian Investment Partners Limited (the “Adviser”) has contractually agreed to waive fees and reimburse expenses to the extent necessary to keep Total Annual Fund Operating Expenses (excluding interest, taxes, brokerage commissions and non-routine expenses) from exceeding 0.74% of the Fund’s average daily net assets until February 28, 2022. This agreement may be terminated: (i) by the Board of Trustees (the “Board”) of Gallery Trust (the “Trust”), for any reason at any time; or (ii) by the Adviser, upon ninety (90) days’ prior written notice to the Trust, effective as of the close of business on February 28, 2022.

Example

This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds.

The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then either redeem or do not redeem your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses are equal to the total annual fund operating expenses after fee reductions and/or expense reimbursements shown in the fee table through February 28, 2022, and total annual fund operating expenses thereafter. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

1 Year	3 Years
\$76	\$531

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in total annual Fund operating expenses or in the example, affect the Fund’s performance. Because the Fund has not commenced operations as of the date of this prospectus, it does not have portfolio turnover information to report.

Principal Investment Strategies

The Fund is a global fund and generally invests in equity securities of companies around the world, as described below, that, in the Adviser’s opinion, are undervalued at the time of purchase based on fundamental value analysis employed by the Adviser. Under normal circumstances, the Fund invests at least 80% of its net assets, plus any borrowings for investment purposes, in equity securities. This 80% investment policy can be changed by the Fund upon 60 days’ prior written notice to shareholders. For purposes of the Fund’s 80% investment policy, equity securities do not include convertible securities that are not immediately convertible into equity securities.

Under normal circumstances, the Fund invests in at least three countries, including the U.S., and invests at least 40% of its total assets in securities of non-U.S. companies or, if conditions are not favorable, invests at least 30% of its total assets in securities of non-U.S. companies. The Fund considers a company to be a non-U.S. company if: (1) the company’s principal securities trading market is outside of the U.S.; (2) while traded in any market, alone or, with respect to a parent company, on a consolidated basis with its subsidiaries, the company derives 50% or more of its annual revenues or annual profits from either goods produced, sales made or services performed outside of the U.S.; (3) the company has 50% or more of its assets located outside of the U.S.; or (4) the company is organized under the laws of, and has a principal office in, a non-U.S. country.

Equity securities include, but are not limited to, common stocks, preferred stocks, convertible securities, private placements, rights, warrants, real estate investment trusts (“REITs”) and American, European or Global depositary receipts, which are certificates typically issued by a bank or trust company that represent ownership interests in securities of non-U.S. or U.S. companies, or other securities representing underlying shares of non-U.S. issuers. Equity securities also include derivatives, master limited partnerships (“MLPs”) and other investment companies (including mutual funds, closed-end funds and exchange-traded funds (“ETFs”)) with economic characteristics similar to equity securities. The Fund may invest in securities of companies with

any market capitalization and, to the extent that the Fund invests in convertible securities, those securities may have any credit rating.

The Fund may invest in securities issued in any currency and may hold foreign currency. The Fund may actively carry on hedging activities, and may utilize derivatives, principally forward foreign currency exchange contracts, to hedge currency risks associated with the purchase of individual securities denominated in a particular currency. In addition, the Fund may, from time to time, hold non-U.S. currencies in order to facilitate or expedite settlement of portfolio transactions, or to minimize the impact of currency value fluctuations.

The Fund may invest in securities of emerging market companies. The Fund considers an “emerging market country” to be any country except the United States, Canada, and those in the MSCI EAFE Index. In considering possible emerging market countries in which the Fund may invest, the Adviser will place particular emphasis on factors such as economic conditions (including growth trends, inflation rates, and trade balances), regulatory and currency controls, accounting standards, and political and social conditions.

The Fund may invest in A-Shares of companies based in China that trade on the Shanghai Stock Exchange and the Shenzhen Stock Exchange through the Shanghai – Hong Kong and Shenzhen – Hong Kong Stock Connect programs (“Stock Connect”). Stock Connect is a mutual stock market access program designed to, among other things, enable foreign investments in China.

Under normal circumstances, no more than 10% of the Fund’s assets will be invested in debt securities issued by governments or by their agencies, instrumentalities or political sub-divisions, or by corporate entities, all of which may be high-yield, high-risk fixed income securities rated lower than BBB by S&P and Baa by Moody’s or, if unrated, considered to be of equivalent quality by the Adviser.

The Adviser’s approach in selecting investments for the Fund is primarily oriented to individual stock selection and is value driven. In selecting stocks for the Fund, the Adviser identifies those stocks that it believes will provide high total return over a market cycle, taking into consideration movements in the price of the individual security and the impact of currency fluctuation on a United States domiciled, dollar-based investor. The Adviser conducts fundamental research on a global basis in order to identify securities that, in the Adviser’s opinion, have the potential for long-term total return. This research effort generally centers on a value-oriented dividend discount methodology with respect to individual securities and market analysis that isolates value across country boundaries. The approach focuses on future anticipated dividends, and discounts the value of those dividends back to what they would be worth if they were being received today. In addition, the analysis typically includes a comparison of the values and current market prices of different possible investments. The Adviser’s general management strategy emphasizes long-term holding of securities, although securities may be sold in the Adviser’s discretion without regard to the length of time that they have been held.

The Fund is considered “non-diversified”, which means that it may invest in the securities of relatively few issuers.

Principal Risks

As with all mutual funds, there is no guarantee that the Fund will achieve its investment objective. You could lose money by investing in the Fund. **A Fund share is not a bank deposit and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency.** The principal risk factors affecting shareholders’ investments in the Fund are set forth below.

Equity Risk – Since it purchases equity securities, the Fund is subject to the risk that stock prices may fall over short or extended periods of time. Historically, the equity market has moved in cycles, and the value of the Fund’s securities may fluctuate from day to day. Individual companies may report poor results or be negatively affected by industry and/or economic trends and developments. The prices of securities issued by such companies may suffer a decline in response. These factors contribute to price volatility, which is the principal risk of investing in the Fund.

Foreign Company Risk – Investing in foreign companies, including direct investments and investments through depositary receipts, poses additional risks since political and economic events unique to a country or region will affect those markets and their issuers. These risks will not necessarily affect the U.S. economy or similar issuers located in the U.S. Securities of foreign companies may not be registered with the U.S. Securities and Exchange Commission (the “SEC”) and foreign companies are generally not subject to the regulatory controls imposed on U.S. issuers and, as a consequence, there is generally less publicly available information about foreign securities than is available about domestic securities. Income from foreign securities owned by the Fund may be reduced by a withholding tax at the source, which tax would reduce income received from the securities comprising the Fund’s portfolio. Foreign securities may also be more difficult to value than securities of U.S. issuers. While depositary receipts provide an alternative to directly purchasing the underlying foreign securities in their respective national markets and currencies, investments in depositary receipts continue to be subject to many of the risks associated with investing directly in foreign securities.

Emerging Markets Securities Risk – The Fund’s investments in emerging markets securities are considered speculative and subject to heightened risks in addition to the general risks of investing in foreign securities. Unlike more established markets, emerging markets may have governments that are less stable, markets that are less liquid and economies that are less developed. In addition, the securities markets of emerging market countries may consist of companies with smaller market capitalizations and may suffer periods of relative illiquidity; significant price volatility; restrictions on foreign investment; and possible restrictions on repatriation of investment income and capital. Furthermore, foreign investors may be required to register the proceeds of sales, and future

economic or political crises could lead to price controls, forced mergers, expropriation or confiscatory taxation, seizure, nationalization or creation of government monopolies.

Market Risk – The prices of and the income generated by the Fund’s securities may decline in response to, among other things, investor sentiment, general economic and market conditions, regional or global instability, and currency and interest rate fluctuations. In addition, the impact of any epidemic, pandemic or natural disaster, or widespread fear that such events may occur, could negatively affect the global economy, as well as the economies of individual countries, the financial performance of individual companies and sectors, and the markets in general in significant and unforeseen ways. Any such impact could adversely affect the prices and liquidity of the securities and other instruments in which the Fund invests, which in turn could negatively impact the Fund’s performance and cause losses on your investment in the Fund.

Active Management Risk – The Fund is subject to the risk that the Adviser’s judgments about the attractiveness, value, or potential appreciation of the Fund’s investments may prove to be incorrect. If the investments selected and strategies employed by the Fund fail to produce the intended results, the Fund could underperform in comparison to its benchmark index or other funds with similar objectives and investment strategies.

Investment Style Risk – The Fund pursues a “value style” of investing. Value investing focuses on companies with stocks that appear undervalued to the Adviser in light of factors such as the company’s earnings, book value, revenues or cash flow. The Adviser’s methodology for analyzing value may differ from other market approaches. If the Adviser’s assessment of market conditions, or a company’s value or its prospects for exceeding earnings expectations is inaccurate, the Fund could suffer losses or produce poor performance relative to other funds. In addition, “value stocks” can continue to be undervalued by the market for long periods of time.

Foreign Currency Risk – As a result of the Fund’s investments in securities denominated in, and/or receiving revenues in, foreign currencies, the Fund will be subject to currency risk. Currency risk is the risk that foreign currencies will decline in value relative to the U.S. dollar or, in the case of hedging positions, that the U.S. dollar will decline in value relative to the currency hedged. In either event, the dollar value of an investment in the Fund would be adversely affected.

Large-Capitalization Company Risk – The large-capitalization companies in which the Fund may invest may lag the performance of smaller capitalization companies because large-capitalization companies may experience slower rates of growth than smaller capitalization companies and may not respond as quickly to market changes and opportunities.

Small- and Mid-Capitalization Company Risk – The small- and mid-capitalization companies in which the Fund may invest may be more vulnerable to adverse business or economic events than larger, more established companies. In particular, investments in these small- and mid-sized companies may pose additional risks, including liquidity risk, because these companies tend to have

limited product lines, markets and financial resources, and may depend upon a relatively small management group. Therefore, small- and mid-cap stocks may be more volatile than those of larger companies. These securities may be traded over-the-counter or listed on an exchange.

Liquidity Risk – Certain securities may be difficult or impossible to sell at the time and the price that the Fund would like. The Fund may have to accept a lower price to sell a security, sell other securities to raise cash, or give up an investment opportunity, any of which could have a negative effect on Fund management or performance.

Non-Diversification Risk – The Fund is classified as “non-diversified,” which means it may invest a larger percentage of its assets in a smaller number of issuers than a diversified fund. To the extent the Fund invests its assets in a smaller number of issuers, the Fund will be more susceptible to negative events affecting those issuers than a diversified fund.

Large Purchase and Redemption Risk – Large purchases or redemptions of the Fund’s shares may force the Fund to purchase or sell securities at times when it would not otherwise do so, and may cause the Fund’s portfolio turnover rate and transaction costs to rise, which may negatively affect the Fund’s performance and have adverse tax consequences for Fund shareholders.

Preferred Stock Risk – Preferred stocks in which the Fund may invest are sensitive to interest rate changes, and are also subject to equity risk, which is the risk that stock prices will fall over short or extended periods of time. The rights of preferred stocks on the distribution of a company’s assets in the event of a liquidation are generally subordinate to the rights associated with a company’s debt securities.

Depository Receipts Risk – Investments in depository receipts may be less liquid and more volatile than the underlying securities in their primary trading market. If a depository receipt is denominated in a different currency than its underlying securities, the Fund will be subject to the currency risk of both the investment in the depository receipt and the underlying security. Holders of depository receipts may have limited or no rights to take action with respect to the underlying securities or to compel the issuer of the receipts to take action. The prices of depository receipts may differ from the prices of securities upon which they are based. Certain of the depository receipts in which the Fund invests may be unsponsored depository receipts. Unsponsored depository receipts may not provide as much information about the underlying issuer and may not carry the same voting privileges as sponsored depository receipts. Unsponsored depository receipts are issued by one or more depositaries in response to market demand, but without a formal agreement with the company that issues the underlying securities.

Convertible Securities Risk – The value of a convertible security is influenced by changes in interest rates (with investment value declining as interest rates increase and increasing as interest rates decline) and the credit standing of the issuer. The price of a convertible security will also normally vary in some proportion to changes in the price of the underlying common stock because of the conversion or exercise feature.

Rights and Warrants Risk – Investments in rights or warrants involve the risk of loss of the purchase value of a right or warrant if the right to subscribe to additional shares is not exercised prior to the right's or warrant's expiration. Also, the purchase of rights and/or warrants involves the risk that the effective price paid for the right and/or warrant added to the subscription price of the underlying security may exceed the market price of the underlying security in instances such as those where there is no movement in the price of the underlying security.

Private Placements Risk – Investment in privately placed securities may be less liquid than in publicly traded securities. Although these securities may be resold in privately negotiated transactions, the prices realized from these sales could be less than those originally paid by the Fund or less than what may be considered the fair value of such securities. Further, companies whose securities are not publicly traded may not be subject to the disclosure and other investor protection requirements that might be applicable if their securities were publicly traded.

Risks of Investing in Other Investment Companies – To the extent the Fund invests in other investment companies, such as open-end funds, closed-end funds and ETFs, the Fund will be subject to substantially the same risks as those associated with the direct ownership of the securities held by such other investment companies. As a shareholder of another investment company, the Fund relies on that investment company to achieve its investment objective. If the investment company fails to achieve its objective, the value of the Fund's investment could decline, which could adversely affect the Fund's performance. By investing in another investment company, Fund shareholders indirectly bear the Fund's proportionate share of the fees and expenses of the other investment company, in addition to the fees and expenses that Fund shareholders directly bear in connection with the Fund's own operations.

Because ETFs and certain closed-end funds are listed on national stock exchanges and are traded like stocks listed on an exchange, their shares potentially may trade at a discount or premium. Investments in ETFs and certain closed-end funds are also subject to brokerage and other trading costs, which could result in greater expenses to the Fund. In addition, because the value of ETF and certain closed-end fund shares depends on the demand in the market, the Adviser may not be able to liquidate the Fund's holdings at the most optimal time, which could adversely affect Fund performance.

REITs Risk – REITs are pooled investment vehicles that own, and usually operate, income-producing real estate. REITs are susceptible to the risks associated with direct ownership of real estate, such as the following: declines in property values; increases in property taxes, operating expenses, interest rates or competition; overbuilding; zoning changes; and losses from casualty or condemnation. REITs typically incur fees that are separate from those of the Fund. Accordingly, the Fund's investments in REITs will result in the layering of expenses such that shareholders will indirectly bear a proportionate share of the REITs' operating expenses, in addition to paying Fund expenses. REIT operating expenses are not reflected in the fee table and example in this prospectus.

MLPs Risk – MLPs are limited partnerships in which the ownership units are publicly traded. MLPs often own several properties or businesses (or own interests) that are related to oil and gas industries or other natural resources, but they also may finance other projects. To the extent that an MLP's interests are all in a particular industry, such as the energy industry, the MLP will be negatively impacted by economic events adversely impacting that industry. Additional risks of investing in an MLP also include those involved in investing in a partnership as opposed to a corporation. For example, state law governing partnerships is often less restrictive than state law governing corporations. Accordingly, there may be fewer protections afforded to investors in an MLP than investors in a corporation; for example, investors in MLPs may have limited voting rights or be liable under certain circumstances for amounts greater than the amount of their investment. In addition, MLPs may be subject to state taxation in certain jurisdictions which will have the effect of reducing the amount of income paid by the MLP to its investors. The Fund's investment in MLPs may result in the layering of expenses, such that shareholders will indirectly bear a proportionate share of the MLPs' operating expenses, in addition to paying Fund expenses. MLP operating expenses are not reflected in the fee table and example in this prospectus.

Energy companies are affected by worldwide energy prices and costs related to energy production. These companies may have significant operations in areas at risk for natural disasters, social unrest and environmental damage. These companies may also be at risk for increased government regulation and intervention, energy conservation efforts, litigation and negative publicity and perception.

Geographic Focus Risk – To the extent that it focuses its investments in a particular country or geographic region, the Fund may be more susceptible to economic, political, regulatory or other events or conditions affecting issuers and countries within that country or geographic region. As a result, the Fund may be subject to greater price volatility and risk of loss than a fund holding more geographically diverse investments.

Stock Connect Investing Risk — Trading through Stock Connect is subject to a number of restrictions that may affect the Fund's investments and returns, including a daily quota that limits the maximum net purchases under Stock Connect each day. In addition, investments made through Stock Connect are subject to relatively untested trading, clearance and settlement procedures. Moreover, A-Shares purchased through Stock Connect generally may only be sold or otherwise transferred through Stock Connect. The Fund's investments in A-Shares purchased through Stock Connect are generally subject to Chinese securities regulations and listing rules. While overseas investors currently are exempt from paying capital gains or value added taxes on income and gains from investments in A-Shares purchased through Stock Connect, these tax rules could be changed, which could result in unexpected tax liabilities for the Fund. Stock Connect operates only on days when both the Chinese and Hong Kong markets are open for trading and when banks in both markets are open on the corresponding settlement days. Therefore, the Fund may be subject to the risk of price fluctuations of A-Shares when Stock Connect is not trading.

Derivatives Risk – The Fund's use of forward contracts is subject to market risk, leverage risk, correlation risk, liquidity risk, hedging risk, credit risk and valuation risk. Market risk is the risk

that the market value of an investment may move up and down, sometimes rapidly and unpredictably. Leverage risk is the risk that the use of leverage may amplify the effects of market volatility on the Fund's share price and may also cause the Fund to liquidate portfolio positions when it would not be advantageous to do so in order to satisfy its obligations. Correlation risk is the risk that changes in the value of the derivative may not correlate perfectly or at all with the underlying asset, rate or index. Liquidity risk is described elsewhere in this section. Hedging risk is the risk that derivatives instruments used for hedging purposes may also limit any potential gain that may result from the increase in value of the hedged asset. To the extent that the Fund engages in hedging strategies, there can be no assurance that such strategy will be effective or that there will be a hedge in place at any given time. Credit risk is the risk that the counterparty to a derivative contract will default or otherwise become unable to honor a financial obligation. Valuation risk is the risk that the derivative may be difficult to value. Each of these risks could cause the Fund to lose more than the principal amount invested in a derivative instrument.

Fixed Income Risk – Fixed income securities are subject to a number of risks, including credit and interest rate risks. Credit risk is the risk that the issuer or obligor will not make timely payments of principal and interest. Changes in an issuer's credit rating or the market's perception of an issuer's creditworthiness may also affect the value of the Fund's investment in that issuer. Interest rate risk is the risk that the value of a fixed income security will fall when interest rates rise. In general, the longer the maturity of a fixed income security, the more likely its value will decline when interest rates rise.

U.S. Government Securities Risk – The Fund's investment in U.S. government obligations may include securities issued or guaranteed as to principal and interest by the U.S. government, or its agencies or instrumentalities. Payment of principal and interest on U.S. government obligations may be backed by the full faith and credit of the United States or may be backed solely by the issuing or guaranteeing agency or instrumentality itself. There can be no assurance that the U.S. government would provide financial support to its agencies or instrumentalities (including government-sponsored enterprises) where it is not obligated to do so. In addition, U.S. government securities are not guaranteed against price movements due to changing interest rates.

Foreign Sovereign Debt Securities Risk – The Fund's investments in foreign sovereign debt securities are subject to the risks that: (i) the governmental entity that controls the repayment of sovereign debt may not be willing or able to repay the principal and/or interest when it becomes due, due to factors such as debt service burden, political constraints, cash flow problems and other national economic factors; (ii) governments may default on their debt securities, which may require holders of such securities to participate in debt rescheduling or additional lending to defaulting governments; and (iii) there is no bankruptcy proceeding by which defaulted sovereign debt may be collected in whole or in part.

Foreign Government Agencies Risk – Bonds issued by government agencies, subdivisions or instrumentalities of foreign governments are generally backed only by the general creditworthiness

and reputation of the entity issuing the bonds and may not be backed by the full faith and credit of the foreign government. Moreover, a foreign government that explicitly provides its full faith and credit to a particular entity may be, due to changed circumstances, unable or unwilling to provide that support. A foreign government agency's operations and financial condition are influenced by the foreign government's economic and other policies.

Corporate Fixed Income Securities Risk – Corporate fixed income securities respond to economic developments, especially changes in interest rates, as well as perceptions of the creditworthiness and business prospects of individual issuers.

High Yield Bond Risk – High yield, or “junk,” bonds are debt securities rated below investment grade. High yield bonds are speculative, involve greater risks of default, downgrade, or price declines and are more volatile and tend to be less liquid than investment-grade securities. Companies issuing high yield bonds are less financially strong, are more likely to encounter financial difficulties, and are more vulnerable to adverse market events and negative sentiments than companies with higher credit ratings.

Performance Information

The Fund is new, and therefore has no performance history. Once the Fund has completed a full calendar year of operations, a bar chart and table will be included that will provide some indication of the risks of investing in the Fund by showing the variability of the Fund's returns and comparing the Fund's performance to a broad measure of market performance. Of course, the Fund's past performance (before and after taxes) does not necessarily indicate how the Fund will perform in the future.

Current performance information is available on the Fund's website at www.mondrian.com/mutualfunds or by calling toll-free to 888-832-4386.

Investment Adviser

Mondrian Investment Partners Limited, serves as investment adviser to the Fund.

Portfolio Managers

Aileen Gan, CFA, Chief Investment Officer — Global Equities, has managed the Fund since its inception in 2020.

James Francken, CFA, Portfolio Manager, has managed the Fund since its inception in 2020.

Charlie Hill, CFA, Portfolio Manager, has managed the Fund since its inception in 2020.

Purchase and Sale of Fund Shares

You may generally purchase or redeem shares on any day that the New York Stock Exchange (“NYSE”) is open for business.

To purchase shares of the Fund for the first time, you must invest at least \$50,000. Subsequent investments must be at least \$100. The Fund may accept investments of smaller amounts in its sole discretion.

If you own your shares directly, you may redeem your shares by contacting the Fund directly by mail at: Mondrian Global Equity Value Fund, P.O. Box 588, Portland, ME 04112 (Express Mail Address: Mondrian Global Equity Value Fund, c/o Atlantic Shareholder Services, LLC, Three Canal Plaza, Ground Floor, Portland, ME 04101) or telephone at 888-832-4386.

If you own your shares through an account with a broker or other financial intermediary, contact that broker or financial intermediary to redeem your shares. Your broker or financial intermediary may charge a fee for its services in addition to the fees charged by the Fund.

Tax Information

The Fund intends to make distributions that may be taxed as ordinary income or capital gains, unless you are investing through a tax-deferred arrangement, such as a 401(k) plan or IRA, in which case your distribution will be taxed when withdrawn from the tax-deferred account.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase shares of the Fund through a broker-dealer or other financial intermediary (such as a bank), the Adviser, without additional cost to the Fund or its shareholders, may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest for the broker-dealer or other intermediary by influencing the broker-dealer or other intermediary to recommend the Fund over another investment. Ask your financial intermediary representative or visit your financial intermediary’s web site for more information about your financial intermediary’s differing and divergent interests and any compensation it receives for administering your Fund investment.

More Information about the Fund’s Investment Objective and Strategies

The investments and strategies described in this prospectus are those that the Fund uses under normal conditions. During unusual economic or market conditions, or for temporary defensive or liquidity purposes, the Fund may, but is not obligated to, invest up to 100% of its assets in money

market instruments and other cash equivalents that would not ordinarily be consistent with its investment objective. If the Fund invests in this manner, it may cause the Fund to forgo greater investment returns for the safety of principal and the Fund may therefore not achieve its investment objective. The Fund will only do so if the Adviser believes that the risk of loss outweighs the opportunity to pursue the Fund's investment objective.

This prospectus describes the Fund's principal investment strategies, and the Fund will normally invest in the types of securities and other investments described in this prospectus. In addition to the securities and other investments and strategies described in this prospectus, the Fund also may invest to a lesser extent in other securities, use other strategies and engage in other investment practices that are not part of its principal investment strategies. These investments and strategies, as well as those described in this prospectus, are described in detail in the Fund's Statement of Additional Information (the "SAI") (for information on how to obtain a copy of the SAI see the back cover of this prospectus). Of course, there is no guarantee that the Fund will achieve its investment goals.

The investment objective of the Fund is to seek long-term total return. The investment objective of the Fund may be changed by the Board without shareholder approval.

The Fund is a global fund and generally invests in equity securities of companies around the world, as described below, that, in the Adviser's opinion, are undervalued at the time of purchase based on fundamental value analysis employed by the Adviser. Under normal circumstances, the Fund invests at least 80% of its net assets, plus any borrowings for investment purposes, in equity securities. This 80% investment policy can be changed by the Fund upon 60 days' prior written notice to shareholders. For purposes of the Fund's 80% investment policy, equity securities do not include convertible securities that are not immediately convertible into equity securities.

Under normal circumstances, the Fund invests in at least three countries, including the U.S., and invests at least 40% of its total assets in securities of non-U.S. companies or, if conditions are not favorable, invests at least 30% of its total assets in securities of non-U.S. companies. The Fund considers a company to be a non-U.S. company if: (1) the company's principal securities trading market is outside of the U.S.; (2) while traded in any market, alone or, with respect to a parent company, on a consolidated basis with its subsidiaries, the company derives 50% or more of its annual revenues or annual profits from either goods produced, sales made or services performed outside of the U.S.; (3) the company has 50% or more of its assets located outside of the U.S.; or (4) the company is organized under the laws of, and has a principal office in, a non-U.S. country.

Equity securities include, but are not limited to, common stocks, preferred stocks, convertible securities, private placements, rights, warrants, real estate investment trusts ("REITs") and American, European or Global depositary receipts, which are certificates typically issued by a bank or trust company that represent ownership interests in securities of non-U.S. or U.S. companies, or other securities representing underlying shares of non-U.S. issuers. Equity securities also include

derivatives, master limited partnerships (“MLPs”) and other investment companies (including mutual funds, closed-end funds and exchange-traded funds (“ETFs”)) with economic characteristics similar to equity securities. The Fund may invest in securities of companies with any market capitalization and, to the extent that the Fund invests in convertible securities, those securities may have any credit rating.

The Fund may invest in securities issued in any currency and may hold foreign currency. The Fund may actively carry on hedging activities, and may utilize derivatives, principally forward foreign currency exchange contracts, to hedge currency risks associated with the purchase of individual securities denominated in a particular currency. In addition, the Fund may, from time to time, hold non-U.S. currencies in order to facilitate or expedite settlement of portfolio transactions, or to minimize the impact of currency value fluctuations.

The Fund may invest in securities of emerging market companies. The Fund considers an “emerging market country” to be any country except the United States, Canada, and those in the MSCI EAFE Index. In considering possible emerging market countries in which the Fund may invest, the Adviser will place particular emphasis on factors such as economic conditions (including growth trends, inflation rates, and trade balances), regulatory and currency controls, accounting standards, and political and social conditions. The Fund considers a company to be an emerging market company if: (1) the company’s principal securities trading market is in an emerging market country; (2) while traded in any market, alone or on a consolidated basis, the company derives 50% or more of its annual revenues or annual profits from either goods produced, sales made or services performed in emerging market countries; (3) the company has 50% or more of its assets located in an emerging market country; or (4) the company is organized under the laws of, and has a principal office in, an emerging market country. From time to time, the Fund may focus its investments in a particular country or geographic region.

Currently, investing in many emerging market countries is not feasible, or may, in the Adviser’s opinion, involve unacceptable foreign exchange, political or governance risks. The Fund focuses its investments in those emerging market countries where the Adviser considers the economies to be developing and where the markets are becoming more sophisticated.

Under normal circumstances, no more than 10% of the Fund’s assets will be invested in debt securities issued by governments or by their agencies, instrumentalities or political sub-divisions, or by corporate entities, all of which may be high-yield, high-risk fixed income securities rated lower than BBB by S&P and Baa by Moody’s or, if unrated, considered to be of equivalent quality by the Adviser.

The Adviser’s approach in selecting investments for the Fund is primarily oriented to individual stock selection and is value driven. In selecting stocks for the Fund, the Adviser identifies those stocks that it believes will provide high total return over a market cycle, taking into consideration movements in the price of the individual security and the impact of currency fluctuation on a United

States domiciled, dollar-based investor. The Adviser conducts fundamental research on a global basis in order to identify securities that, in the Adviser's opinion, have the potential for long-term total return. This research effort generally centers on a value-oriented dividend discount methodology with respect to individual securities and market analysis that isolates value across country boundaries. The approach focuses on future anticipated dividends, and discounts the value of those dividends back to what they would be worth if they were being received today. In addition, the analysis typically includes a comparison of the values and current market prices of different possible investments. The Adviser's general management strategy emphasizes long-term holding of securities, although securities may be sold in the Adviser's discretion without regard to the length of time that they have been held.

The Fund is considered "non-diversified", which means that it may invest in the securities of relatively few issuers.

More Information about Risk

Investing in the Fund involves risk and there is no guarantee that the Fund will achieve its goals. The Adviser's judgments about the markets, the economy, or companies may not anticipate actual market movements, economic conditions or company performance, and these judgments may affect the return on your investment. You could lose money on your investment in the Fund, just as you could with other investments.

The value of your investment in the Fund is based on the value of the securities the Fund holds. These prices change daily due to economic and other events that affect particular companies and other issuers. These price movements, sometimes called volatility, may be greater or lesser depending on the types of securities the Fund owns and the markets in which they trade. The effect on the Fund of a change in the value of a single security will depend on how widely the Fund diversifies its holdings.

Equity Risk – Equity securities in which the Fund invests include publicly and privately issued equity securities, common and preferred stocks, warrants, REITs, shares of depositary receipts and rights to subscribe to common stock and convertible securities. Common stock represents an equity, or ownership, interest in an issuer. Preferred stock provides a fixed dividend that is paid before any dividends are paid to common stockholders, and which takes precedence over common stock in the event of a liquidation. Like common stock, preferred stocks represent partial ownership in a company, although preferred stock shareholders do not enjoy any of the voting rights of common stockholders. Also, unlike common stock, a preferred stock pays a fixed dividend that does not fluctuate, although the company does not have to pay this dividend if it lacks the financial ability to do so. Investments in equity securities in general are subject to market risks that may cause their prices to fluctuate over time. The value of securities convertible into equity securities, such as warrants or convertible debt, is also affected by prevailing interest rates, the credit quality of the issuer and any call provision. Fluctuations in the value of equity securities in which a mutual fund

invests will cause the fund's net asset value ("NAV") to fluctuate. An investment in a portfolio of equity securities may be more suitable for long-term investors who can bear the risk of these share price fluctuations.

Foreign/Emerging Markets Securities Risk – Investments in securities of foreign companies (including direct investments as well as investments through depositary receipts) can be more volatile than investments in U.S. companies. Diplomatic, political, or economic developments, including nationalization or appropriation, could affect investments in foreign companies. Foreign securities markets generally have less trading volume and less liquidity than U.S. markets. In addition, the value of securities denominated in foreign currencies, and of dividends from such securities, can change significantly when foreign currencies strengthen or weaken relative to the U.S. dollar. Financial statements of foreign issuers are governed by different accounting, auditing, and financial reporting standards than the financial statements of U.S. issuers and may be less transparent and uniform than in the United States. Thus, there may be less information publicly available about foreign issuers than about most U.S. issuers. Transaction costs are generally higher than those in the United States and expenses for custodial arrangements of foreign securities may be somewhat greater than typical expenses for custodial arrangements of similar U.S. securities. Some foreign governments levy withholding taxes against dividend and interest income. Although in some countries a portion of these taxes are recoverable, the non-recovered portion will reduce the income received from the securities comprising the portfolio. These risks may be heightened with respect to emerging market countries since political turmoil and rapid changes in economic conditions are more likely to occur in these countries.

Certain foreign countries have experienced outbreaks of infectious illnesses and may be subject to other public health threats, infectious illnesses, diseases or similar issues in the future. Any spread of an infectious illness, public health threat or similar issue could reduce consumer demand or economic output, result in market closures, travel restrictions or quarantines, and generally have a significant impact on the economies of the affected country and other countries with which it does business, which in turn could adversely affect the Fund's investments in that country and other affected countries.

Foreign Custody. The Fund may hold foreign securities and cash with foreign banks, agents, and securities depositories appointed by the Fund's custodian (each a "Foreign Custodian"). Some Foreign Custodians may be recently organized or new to the foreign custody business. In some countries, Foreign Custodians may be subject to little or no regulatory oversight over or independent evaluation of their operations. Further, the laws of certain countries may place limitations on the Fund's ability to recover its assets if a Foreign Custodian enters bankruptcy. Investments in emerging markets may be subject to even greater custody risks than investments in more developed markets. Custody services in emerging market countries are very often underdeveloped and may be considerably less well

regulated than in more developed countries, and thus may not afford the same level of investor protection as would apply in developed countries.

Market Risk – The risk that the market value of an investment may move up and down, sometimes rapidly and unpredictably. The Fund’s net asset value (“NAV”) per share will fluctuate with the market prices of its portfolio securities. Market risk may affect a single issuer, an industry, a sector or the equity or bond market as a whole. Markets for securities in which the Fund invests may decline significantly in response to adverse issuer, political, regulatory, market, economic or other developments that may cause broad changes in market value, public perceptions concerning these developments, and adverse investor sentiment or publicity. Similarly, the impact of any epidemic, pandemic or natural disaster, or widespread fear that such events may occur, could negatively affect the global economy, as well as the economies of individual countries, the financial performance of individual companies and sectors, and the markets in general in significant and unforeseen ways. Any such impact could adversely affect the prices and liquidity of the securities and other instruments in which the Fund invests, which in turn could negatively impact the Fund’s performance and cause losses on your investment in the Fund. Recent examples include pandemic risks related to COVID-19 and aggressive measures taken worldwide in response by governments, including closing borders, restricting international and domestic travel, and the imposition of prolonged quarantines of large populations, and by businesses, including changes to operations and reducing staff. The impact of the COVID-19 pandemic may be short term or may last for an extended period of time, and in either case could result in a substantial economic downturn or recession.

Foreign Currency Risk – Currency exchange rates may fluctuate in response to, among other things, changes in interest rates, intervention (or failure to intervene) by U.S. or foreign governments, central banks or supranational entities, or by the imposition of currency controls or other political developments in the U.S. or abroad. In addition, foreign government exchange controls and restrictions on repatriation of currency can result in losses to the Fund if it is unable to deliver or receive currency or monies to settle obligations. Such governmental actions could also cause hedges the Fund has entered into to be rendered useless, resulting in the Fund having full currency exposure while incurring transaction costs.

The Fund is also subject to the risks of trading in the foreign exchange market, which is subject to relatively little government oversight or regulation. Foreign currencies are not traded on exchanges; rather, a bank or dealer will act as agent or as principal in order to make or take delivery of a specified lot of a particular currency for the Fund’s account. The Fund is, therefore, subject to the risk that the counterparty will default or otherwise fail to honor its obligations. In general, the Adviser seeks best execution in the execution of foreign exchange transactions by comparing rates across counterparties and selecting the counterparty that the Adviser believes can provide best execution. However, due to pricing and trading restrictions, certain emerging market currency transactions are executed by the Fund’s custodian, and the Fund and the Adviser have a limited ability to negotiate or monitor the prices at which such transactions are executed.

Large Purchase and Redemption Risk – Large purchases or redemptions of the Fund’s shares may affect the Fund, since the Fund may be required to sell portfolio securities if it experiences redemptions, and the Fund will need to invest additional cash that it receives. While it is impossible to predict the overall impact of these transactions over time, there could be adverse effects on Fund management or performance to the extent the Fund may be required to sell securities or invest cash at times when it would not otherwise do so. These transactions could also have tax consequences if sales of securities result in gains, and could also increase transaction costs or portfolio turnover. The Adviser is committed to minimizing the impact of such transactions on the Fund, and may seek to effect the transactions in-kind, to the extent consistent with pursuing the investment objective of the Fund.

Depository Receipts Risk – American Depositary Receipts (“ADRs”) are typically trust receipts issued by a U.S. bank or trust company that evidence an indirect interest in underlying securities issued by a foreign entity. Global Depositary Receipts (“GDRs”), European Depositary Receipts (“EDRs”), and other types of depository receipts are typically issued by non-U.S. banks or financial institutions to evidence an interest in underlying securities issued by either a U.S. or a non-U.S. entity. Investments in non-U.S. issuers through ADRs, GDRs, EDRs, and other types of depository receipts generally involve risks applicable to other types of investments in non-U.S. issuers. Investments in depository receipts may be less liquid and more volatile than the underlying securities in their primary trading market. If a depository receipt is denominated in a different currency than its underlying securities, the Fund will be subject to the currency risk of both the investment in the depository receipt and the underlying security. The values of depository receipts may decline for a number of reasons relating to the issuers or sponsors of the depository receipts, including, but not limited to, insolvency of the issuer or sponsor. Holders of depository receipts may have limited or no rights to take action with respect to the underlying securities or to compel the issuer of the receipts to take action. The prices of depository receipts may differ from the prices of securities upon which they are based.

The Fund may invest in unsponsored depository receipts, which are issued by one or more depositories without a formal agreement with the company that issues the underlying securities. Holders of unsponsored depository receipts generally bear all the costs thereof, and the depositories of unsponsored depository receipts frequently are under no obligation to distribute shareholder communications received from the issuers of the underlying securities or to pass through voting rights with respect to the underlying securities. In addition, the issuers of the securities underlying unsponsored depository receipts are not obligated to disclose material information to the market and, therefore, there may be less information available regarding such issuers and there may not be a correlation between such information and the market value of the depository receipts.

REITs Risk – REITs are pooled investment vehicles that own, and usually operate, income-producing real estate. REITs are susceptible to the risks associated with direct ownership of real estate, such as the following: declines in property values; increases in property taxes, operating

expenses, interest rates or competition; overbuilding; zoning changes; and losses from casualty or condemnation. REITs typically incur fees that are separate from those of the Fund. Accordingly, the Fund's investments in REITs will result in the layering of expenses such that shareholders will indirectly bear a proportionate share of the REITs' operating expenses, in addition to paying Fund expenses. REIT operating expenses are not reflected in the fee table and example in this prospectus.

Some REITs may have limited diversification and may be subject to risks inherent in financing a limited number of properties. REITs depend generally on their ability to generate cash flow to make distributions, and may be subject to defaults by borrowers and to self-liquidations. In addition, a REIT may be affected by its failure to qualify for tax-free pass-through of income under the Internal Revenue Code of 1986, as amended (the "Code"), or its failure to maintain exemption from registration under the 1940 Act.

MLPs Risk — MLPs are limited partnerships in which the ownership units are publicly traded. MLPs often own several properties or businesses (or own interests) that are related to oil and gas industries or other natural resources, but they also may finance other projects. To the extent that an MLP's interests are all in a particular industry, the MLP will be negatively impacted by economic events adversely impacting that industry. Additional risks of investing in an MLP also include those involved in investing in a partnership as opposed to a corporation. For example, state law governing partnerships is often less restrictive than state law governing corporations. Accordingly, there may be fewer protections afforded to investors in an MLP than investors in a corporation. For example, investors in MLPs may have limited voting rights or be liable under certain circumstances for amounts greater than the amount of their investment. In addition, MLPs may be subject to state taxation in certain jurisdictions which will have the effect of reducing the amount of income paid by the MLP to its investors. A Fund's investment in MLPs may result in the layering of expenses, such that shareholders will indirectly bear a proportionate share of the MLPs' operating expenses, in addition to paying Fund expenses. MLP operating expenses are not reflected in the fee table and example in this prospectus.

Stock Connect Investing Risk— The Fund may invest in A-Shares of companies based in China that trade on the Shanghai Stock Exchange and the Shenzhen Stock Exchange through the Shanghai – Hong Kong and Shenzhen – Hong Kong Stock Connect programs ("Stock Connect"). Trading through Stock Connect is subject to a number of restrictions that may affect the Fund's investments and returns, including a daily quota that limits the maximum net purchases under Stock Connect each day. In addition, investments made through Stock Connect are subject to relatively untested trading, clearance and settlement procedures. Moreover, A-Shares purchased through Stock Connect generally may only be sold or otherwise transferred through Stock Connect. The Fund's investments in A-Shares purchased through Stock Connect are generally subject to Chinese securities regulations and listing rules. While overseas investors currently are exempt from paying capital gains or value added taxes on income and gains from investments in A-Shares purchased through Stock Connect, these tax rules could be changed, which could result in unexpected tax liabilities for the Fund. Stock Connect operates only on days when both the Chinese and Hong

Kong markets are open for trading and when banks in both markets are open on the corresponding settlement days. Therefore, the Fund may be subject to the risk of price fluctuations of A-Shares during the time when Stock Connect is not trading. Because of the way in which A-Shares are held in Stock Connect, the Fund may not be able to exercise the rights of a shareholder and may be limited in its ability to pursue claims against the issuer of a security, and may suffer losses in the event the depository of the Shanghai Stock Exchange or Shenzhen Stock Exchange becomes insolvent. Stock Connect is a relatively new program. Further developments are likely and there can be no assurance as to the program's continued existence or whether future developments regarding the program may restrict or adversely affect the Fund's investments or returns. In addition, the application and interpretation of the laws and regulations of Hong Kong and China, and the rules, policies or guidelines published or applied by relevant regulators and exchanges in respect of Stock Connect are uncertain, and they may have a detrimental effect on the Fund's investments and returns.

Energy Industries Risk - The profitability of companies in the energy industries is related to worldwide energy prices and costs related to energy production. The energy industries are cyclical and highly dependent on commodity prices. Energy-related companies can be significantly affected by the supply of, and demand for, particular energy products (such as oil and natural gas). Companies in the energy industries may be adversely affected by natural disasters or other catastrophes. The companies may be at risk for environmental damage claims and other types of litigation. Companies in the energy industries also may be adversely affected by changes in exchange rates, interest rates, economic conditions, tax treatment, government regulation and intervention, negative perception, efforts at energy conservation and world events in the regions in which the companies operate (e.g., expropriation, nationalization, confiscation of assets and property or the imposition of restrictions on foreign investments and repatriation of capital, military coups, social unrest, violence or labor unrest). Companies in the energy industries may have significant capital investments in, or engage in transactions involving, emerging market countries, which may heighten these risks.

Derivatives Risk – The Fund's use of forward contracts is subject to derivatives risk. Derivatives are often more volatile than other investments and may magnify the Fund's gains or losses. There are various factors that affect the Fund's ability to achieve its objective with derivatives. Successful use of a derivative depends upon the degree to which prices of the underlying assets correlate with price movements in the derivatives the Fund buys or sells. The Fund could be negatively affected if the change in market value of its securities fails to correlate perfectly with the values of the derivatives it purchased or sold. The lack of a liquid secondary market for a derivative may prevent the Fund from closing its derivative positions and could adversely impact its ability to achieve its investment objective or to realize profits or limit losses. Because derivative instruments may be purchased by the Fund for a fraction of the market value of the investments underlying such instruments, a relatively small price movement in the underlying investment may result in an immediate and substantial gain or loss to the Fund. Derivatives are often more volatile than other investments and the Fund may lose more in a derivative than it originally invested in it.

Additionally, some derivative instruments are subject to counterparty risk, meaning that the party that issues the derivative may experience a significant credit event and may be unwilling or unable to make timely settlement payments or otherwise honor its obligations.

Forward Contracts. A forward contract involves a negotiated obligation to purchase or sell a specific security or currency at a future date (with or without delivery required), which may be any fixed number of days from the date of the contract agreed upon by the parties, at a price set at the time of the contract. Forward contracts are not traded on exchanges; rather, a bank or dealer will act as agent or as principal in order to make or take future delivery of a specified lot of a particular security or currency for the Fund's account. Risks associated with forwards may include: (i) an imperfect correlation between the movement in prices of forward contracts and the securities or currencies underlying them; (ii) an illiquid market for forwards; (iii) difficulty in obtaining an accurate value for the forwards; and (iv) the risk that the counterparty to the forward contract will default or otherwise fail to honor its obligation. Because forwards require only a small initial investment in the form of a deposit or margin, they also involve a high degree of leverage.

Fixed Income Risk – The market values of fixed income investments change in response to interest rate changes and other factors. During periods of rising interest rates, the values of outstanding fixed income securities generally decrease. Moreover, while securities with longer maturities tend to produce higher yields, the prices of longer maturity securities are also subject to greater market fluctuations as a result of changes in interest rates. A rise in interest rates may also increase volatility and reduce liquidity in the fixed income markets, and result in a decline in the value of the fixed income investments held by the Fund. In addition, reductions in dealer market-making capacity as a result of structural or regulatory changes could further decrease liquidity and/or increase volatility in the fixed income markets. As a result of these market conditions, the Fund's value may fluctuate and/or the Fund may experience increased redemptions from shareholders, which may impact the Fund's liquidity or force the Fund to sell securities into a declining or illiquid market.

In addition to these risks, fixed income securities may be subject to credit risk, which is the possibility that an issuer will be unable or unwilling to make timely payments of either principal or interest. Rating agencies are private services that provide ratings of the credit quality of fixed income securities. Ratings assigned by a rating agency are not absolute standards of credit quality and do not evaluate market risks or the liquidity of securities. Rating agencies may fail to make timely changes in credit ratings, and an issuer's current financial condition may be better or worse than a rating indicates.

U.S. Government Securities Risk – U.S. government securities, such as Treasury bills, notes and bonds and mortgage-backed securities guaranteed by the Government National Mortgage Association, are supported by the full faith and credit of the United States; others are supported by

the right of the issuer to borrow from the U.S. Treasury; others are supported by the discretionary authority of the U.S. government to purchase the agency's obligations; and still others are supported only by the credit of the issuing agency, instrumentality, or enterprise. Although U.S. government-sponsored enterprises such as Federal Home Loan Mortgage Corporation ("Freddie Mac") and Federal National Mortgage Association ("Fannie Mae") may be chartered or sponsored by Congress, they are not funded by Congressional appropriations, and their securities are not issued by the U.S. Treasury nor supported by the full faith and credit of the U.S. government. There is no assurance that the U.S. government would provide financial support to its agencies and instrumentalities if not required to do so. The maximum potential liability of the issuers of some U.S. government securities held by the Fund may greatly exceed their current resources, including any legal right to support from the U.S. Treasury. It is possible that issuers of U.S. government securities will not have the funds to meet their payment obligations in the future. Fannie Mae and Freddie Mac have been operating under conservatorship, with the Federal Housing Finance Administration ("FHFA") acting as their conservator, since September 2008. The entities are dependent upon the continued support of the U.S. Department of the Treasury and FHFA in order to continue their business operations. These factors, among others, could affect the future status and role of Fannie Mae and Freddie Mac and the value of their securities and the securities which they guarantee. Additionally, the U.S. government and its agencies and instrumentalities do not guarantee the market values of their securities, which may fluctuate.

High Yield Bond Risk – High yield, or "junk," bonds are highly speculative securities that are usually issued by smaller, less creditworthy and/or highly leveraged (indebted) companies. Compared with investment-grade bonds, high yield bonds are considered to carry a greater degree of risk and are considered to be less likely to make payments of interest and principal. In particular, lower-quality high yield bonds (rated CCC, CC, C, or unrated securities judged to be of comparable quality) are subject to a greater degree of credit risk than higher-quality high yield bonds and may be near default. High yield bonds rated D are in default. Market developments and the financial and business conditions of the issuers of these securities generally influence their price and liquidity more than changes in interest rates, when compared to investment-grade debt securities.

Information about Portfolio Holdings

A description of the Fund's policies and procedures with respect to the circumstances under which the Fund discloses its portfolio holdings is available in the SAI. In addition, the Fund discloses its complete portfolio holdings on the internet at www.mondrian.com/mutualfunds within 30 days after the end of each quarter. The Adviser may exclude any portion of the Fund's portfolio holdings from such publication when deemed in the best interest of the Fund. The portfolio holdings information placed on the Fund's website generally will remain there until replaced by new postings as described above.

Investment Adviser

Mondrian Investment Partners Limited (the “Adviser”), a limited company organized under the laws of England and Wales in 1990, serves as the investment adviser to the Fund. The Adviser is located at 10 Gresham Street, 5th Floor, London, England EC2V 7JD. The Adviser is 100% employee owned through Atlantic Value Investment Partnership LP. As of May 31, 2020, the Adviser had approximately \$48 billion in assets under management.

The Adviser makes investment decisions for the Fund and continuously reviews, supervises and administers the Fund’s investment program. The Board supervises the Adviser and establishes policies that the Adviser must follow in its management activities.

For its services to the Fund, the Adviser is entitled to a fee, which is calculated daily and paid monthly, at an annual rate of 0.65% of the average daily net assets of the Fund.

The Adviser has contractually agreed to reduce its fees and/or reimburse expenses to the extent necessary to keep total annual Fund operating expenses (excluding interest, taxes, brokerage commissions and non-routine expenses) from exceeding 0.74% of the Fund’s average daily net assets until February 28, 2022. This agreement may be terminated: (i) by the Board, for any reason at any time; or (ii) by the Adviser, upon ninety (90) days’ prior written notice to the Trust, effective as of the close of business on February 28, 2022.

In cases where a shareholder of the Fund has an investment advisory relationship with the Adviser, the Adviser may reduce the shareholder’s investment advisory fees at the separate account level by an amount equal to the shareholder’s pro rata share of the advisory fees paid by the Fund. This procedure would be utilized with clients having contractual relationships based on total assets managed by the Adviser to avoid situations where excess advisory fees might be paid to the Adviser. In no event should a client pay higher total advisory fees as a result of the client’s investment in the Fund.

A discussion regarding the basis for the Board’s approval of the Fund’s investment advisory agreement will be available in the Fund’s first Annual or Semi-Annual Report to Shareholders.

Portfolio Managers

Aileen Gan, CFA, Chief Investment Officer — Global Equities, joined the Adviser in 2005 and serves as a portfolio manager of the Fund. Ms. Gan has extensive experience in developed markets working initially within Mondrian’s Non-US Equity Team, before her current role heading up the Global Equity Team. Her research responsibilities include coverage of US, Singapore and Australian markets. Prior to joining the Adviser, Ms. Gan was a consultant at Accenture, specialising in the financial services sector, firstly in Singapore and subsequently in the UK. Ms. Gan is a Commerce graduate from the University of Melbourne, Australia and holds a Masters of Commerce degree from the University of New South Wales, Australia. She is a CFA Charterholder and a member of the CPA Australia, the CFA Institute and the CFA Society of the UK.

James Francken, CFA, Portfolio Manager, joined the Adviser in 2009 and serves as a portfolio manager of the Fund. Prior to joining the Adviser, Mr. Francken worked for Investec Asset Management. Mr. Francken is a graduate of Exeter College, Oxford University and Emmanuel College, Cambridge University and holds an MBA in Finance from London Business School. Mr. Francken is a CFA Charterholder and a member of the CFA Institute and the CFA Society of the UK.

Charlie Hill, CFA, Portfolio Manager, joined the Adviser in 2016 and serves as portfolio manager of the Fund. Prior to joining the Adviser, Mr. Hill was a Fund Manager at Neptune Investment Management from January 2013 to July 2016. Prior to that, he started his career at Deloitte LLP, where he qualified as a Chartered Accountant in the Corporate International Tax practice. Mr. Hill graduated from the University of Oxford in 2009 with a BA (Hons) in Classics. Mr. Hill is a CFA Charterholder and is a member of the CFA Institute and the Institute of Chartered Accountants of England and Wales.

The SAI provides additional information about the portfolio managers' compensation, other accounts managed, and ownership of Fund shares.

Related Performance Data of the Adviser

The following tables give the related performance of all other global equity accounts (the "Other Global Equity Accounts") managed by the Adviser during the periods indicated with investment objectives, policies and strategies that are substantially similar to those of the Fund. The information below does not represent the historical performance of the Fund and should not be considered a prediction of its future performance. The performance of the Fund may vary from the performance of the Other Global Equity Accounts. The performance information shown below is based on a composite of all of the Adviser's accounts with investment objectives, policies and strategies that are substantially similar to those of the Fund and has been adjusted to give effect to the estimated annualized net expenses of the Fund (as set forth in the Annual Fund Operating Expenses table on page 1).

The manner in which the performance was calculated for the Other Global Equity Accounts differs from that of registered mutual funds such as the Fund. If the performance was calculated in accordance with SEC standardized performance methodology, the performance results may have been different. The Other Global Equity Accounts have not been registered under the 1940 Act, and therefore, are not subject to certain investment limitations, diversification requirements and other restrictions imposed by the 1940 Act. If the Other Global Equity Accounts had been registered under the 1940 Act, their performance and the composite performance might have been adversely affected. In addition, the Other Global Equity Accounts were not subject to Subchapter M of the Code. If the Other Global Equity Accounts had been subject to Subchapter M, its performance might have been adversely affected.

The investment results for the Other Global Equity Accounts presented below are not intended to predict or suggest the future returns of the Fund. **The performance data shown below should not be considered a substitute for the Fund's own performance information.** Investors should be aware that the use of a methodology different than that used below to calculate performance could result in different performance data.

The bar chart and table below show:

- Changes in the Other Global Equity Accounts' performance from year to year; and
- How the Other Global Equity Accounts' average annual returns for 1, 5 and 10 years compare with those of a broad measure of market performance.

All returns are stated before the imposition of taxes. After-tax returns would be lower than those shown.

THE FOLLOWING DATA DOES NOT REPRESENT THE PERFORMANCE OF THE FUND

Average Annual Total Returns for Periods Ended December 31, 2019

	1 Year	5 Years	10 Years
Other Global Equity Accounts (Adjusted for Fees and Net Expenses of the Fund)	25.55%	8.18%	7.60%
MSCI All Country World Index (reflects no deduction for fees, expenses, or taxes (except foreign withholding taxes)) ²	26.60%	8.41%	8.79%

¹ The performance information is calculated in and expressed in U.S. dollars. All returns presented were calculated on a total return basis and include all dividends and interest, accrued income, and realized and unrealized gains and losses. Returns are calculated net of irrecoverable withholding tax on dividend income. Investment transactions are accounted for on a trade date basis. Returns are calculated using the modified Dietz method, which is a mathematical technique to evaluate a portfolio's return based on a time-weighted calculation of its cash flows. Accounts are included in the composite from the first full month of investment through the last full month of investment. The performance information shown from July 2017 to date represents one non-fee paying account comprised of the Adviser's capital.

² The MSCI All Country World Index is a market capitalization weighted index designed to provide a broad measure of equity-market performance throughout the world.

Purchasing, Selling and Exchanging Fund Shares

This section tells you how to purchase, sell (sometimes called "redeem") and exchange shares of the Fund.

For information regarding the federal income tax consequences of transactions in shares of the Fund, including information about cost basis reporting, see "Taxes."

How to Purchase Fund Shares

To purchase shares directly from the Fund through its transfer agent, complete and send in the application. If you need an application or have questions, please call 888-832-4386.

If you purchase shares directly from the Fund, you will receive a confirmation of each transaction and monthly statements detailing Fund balances and all transactions completed during the prior month. Automatic reinvestments of distributions may be confirmed only by monthly statement. You should verify the accuracy of all transactions in your account as soon as you receive your confirmations and monthly statements.

All investments must be made by check, wire or Automated Clearing House (“ACH”). All checks must be made payable in U.S. dollars and drawn on U.S. financial institutions. The Fund does not accept purchases made by third-party checks, credit cards, credit card checks, cash, traveler’s checks, money orders or cashier’s checks.

The Fund reserves the right to reject any specific purchase order for any reason. The Fund is not intended for short-term trading by shareholders in response to short-term market fluctuations. For more information about the Fund’s policy on short-term trading, see “Excessive Trading Policies and Procedures.”

The Fund does not generally accept investments by non-U.S. persons. Non-U.S. persons may be permitted to invest in the Fund subject to the satisfaction of enhanced due diligence. Please contact the Fund for more information.

By Mail

You can open an account with the Fund by sending a check and your account application to the address below. You can add to an existing account by sending the Fund a check and, if possible, the “Invest by Mail” stub that accompanies your transaction confirmation. Be sure your check identifies clearly your name, your account number and the Fund name.

Regular Mail Address

Mondrian Global Equity Value Fund
P.O. Box 588
Portland, ME 04112

Express Mail Address

Mondrian Global Equity Value Fund
c/o Atlantic Shareholder Services, LLC
Three Canal Plaza, Ground Floor
Portland, ME, 04101

The Fund does not consider the U.S. Postal Service or other independent delivery services to be its agents. Therefore, deposit in the mail or with such services of purchase orders does not constitute receipt by the Fund’s transfer agent. The share price used to fill the purchase order is the next price calculated by the Fund after the Fund’s transfer agent receives the order in proper form at its office, not at the P.O. Box provided for regular mail delivery.

By Wire

To open an account by wire, call 888-832-4386 for details. To add to an existing account by wire, wire your money using the wiring instructions set forth below (be sure to include the Fund name and your account number).

Purchases In-Kind

Subject to the approval of the Fund, an investor may purchase shares of the Fund with liquid securities and other assets that are eligible for purchase by the Fund (consistent with the Fund's investment policies and restrictions) and that have a value that is readily ascertainable in accordance with the Fund's valuation policies. These transactions will be effected only if the Adviser deems the security to be an appropriate investment for the Fund. Assets purchased by the Fund in such transactions will be valued in accordance with procedures adopted by the Fund. The Fund reserves the right to amend or terminate this practice at any time.

Minimum Purchases

To purchase shares of the Fund for the first time, you must invest at least \$50,000. Subsequent investments must be at least \$100. The Fund may accept investments of smaller amounts in its sole discretion.

Fund Codes

The Fund's reference information, which is listed below, will be helpful to you when you contact the Fund to purchase or exchange shares, check daily NAV, or obtain additional information.

Ticker Symbol	CUSIP	Fund Code
MPGVX	36381Y702	271-7

General Information

You may generally purchase shares on any day that the NYSE is open for business (a “Business Day”). Shares cannot be purchased by Federal Reserve wire on days that either the NYSE or the Federal Reserve is closed.

The Fund’s price per share will be the NAV per share next determined after the Fund or an authorized institution (defined below) receives your purchase order in proper form. “Proper form” means that the Fund was provided with a complete and signed account application, including the investor’s social security number or tax identification number, and other identification required by law or regulation, as well as sufficient purchase proceeds.

The Fund calculates its NAV once each Business Day as of the close of normal trading on the NYSE (normally, 4:00 p.m., Eastern Time). To receive the current Business Day’s NAV, the Fund or an authorized institution must receive your purchase order in proper form before the close of normal trading on the NYSE. If the NYSE closes early, as in the case of scheduled half-day trading or unscheduled suspensions of trading, the Fund reserves the right to calculate NAV as of the earlier closing time. The Fund will not accept orders that request a particular day or price for the transaction or any other special conditions. Shares will only be priced on Business Days. Since securities that are traded on foreign exchanges may trade on days that are not Business Days, the value of the Fund’s assets may change on days when you are unable to purchase or redeem shares.

Buying or Selling Shares through a Financial Intermediary

In addition to being able to buy and sell Fund shares directly from the Fund through its transfer agent, you may also buy or sell shares of the Fund through accounts with financial intermediaries, such as brokers and other institutions that are authorized to place trades in Fund shares for their customers. Your financial intermediary is responsible for transmitting all purchase and redemption requests, investment information, documentation and money to the Fund on a timely basis. The Fund is not responsible for the failure of your financial intermediary to carry out its responsibilities.

Certain financial intermediaries, including certain broker-dealers and shareholder organizations, are authorized to act as agent on behalf of the Fund with respect to the receipt of purchase and redemption orders for Fund shares (“authorized institutions”). Authorized institutions are also authorized to designate other intermediaries to receive purchase and redemption orders on the Fund’s behalf. The Fund will be deemed to have received a purchase or redemption order when an authorized institution or, if applicable, an authorized institution’s designee, receives the order. Orders will be priced at the Fund’s NAV next computed after they are received by an authorized institution or an authorized institution’s designee. To determine whether your financial intermediary is an authorized institution or an authorized institution’s designee such that it may act as agent on behalf of the Fund with respect to purchase and redemption orders for Fund shares, you should contact your financial intermediary directly.

If you deal directly with a financial intermediary, you will have to follow its procedures for transacting with the Fund. Your financial intermediary may charge a fee for your purchase and/or redemption transactions. For more information about how to purchase or sell Fund shares through a financial intermediary, you should contact your financial intermediary directly.

How the Fund Calculates NAV

The NAV of the Fund's shares is determined by dividing the total value of the Fund's portfolio investments and other assets, less any liabilities, by the total number of shares outstanding.

In calculating NAV, the Fund generally values its investment portfolio at market price. If market prices are not readily available or the Fund reasonably believes that they are unreliable, such as in the case of a security value that has been materially affected by events occurring after the relevant market closes, the Fund is required to price those securities at fair value as determined in good faith using methods approved by the Board. Pursuant to the policies adopted by, and under the ultimate supervision of, the Board, these methods are implemented through the Trust's Fair Value Pricing Committee, members of which are appointed by the Board. The Fund's determination of a security's fair value price often involves the consideration of a number of subjective factors, and is therefore subject to the unavoidable risk that the value that the Fund assigns to a security may be higher or lower than the security's value would be if a reliable market quotation for the security was readily available.

There may be limited circumstances in which the Fund would price securities at fair value for stocks of U.S. companies that are traded on U.S. exchanges – for example, if the exchange on which a portfolio security is principally traded closed early or if trading in a particular security was halted during the day and did not resume prior to the time the Fund calculated its NAV.

With respect to non-U.S. securities held by the Fund, the Fund may take factors influencing specific markets or issuers into consideration in determining the fair value of a non-U.S. security. Foreign securities markets may be open on days when the U.S. markets are closed. In such cases, the value of any foreign securities owned by the Fund may be significantly affected on days when investors cannot buy or sell shares. In addition, due to the difference in times between the close of the foreign markets and the time as of which the Fund prices its shares, the value the Fund assigns to securities may not be the same as the quoted or published prices of those securities on their primary markets or exchanges. In determining fair value prices, the Fund may consider the performance of securities on their primary exchanges, foreign currency appreciation/depreciation, securities market movements in the United States, or other relevant information related to the securities.

When valuing fixed-income securities with remaining maturities of more than 60 days, the Fund uses the value of the security provided by pricing services. The values provided by a pricing service may be based upon market quotations for the same security, securities expected to trade in a similar manner or a pricing matrix. When valuing fixed-income securities with remaining maturities of 60

days or less, the Fund may use the security's amortized cost. Amortized cost and the use of a pricing matrix in valuing fixed-income securities are forms of fair value pricing.

Other assets for which market quotations are not readily available will be valued at their fair value as determined in good faith by or under the direction of the Board.

How to Sell Your Fund Shares

If you own your shares directly, you may sell your shares on any Business Day by contacting the Fund directly by mail or telephone at 888-832-4386.

If you own your shares through an account with a broker or other institution, contact that broker or institution to sell your shares. Your broker or institution may charge a fee for its services in addition to the fees charged by the Fund.

If you would like to have your redemption proceeds, including proceeds generated as a result of closing your account, sent to a third party or an address other than your own, please notify the Fund in writing.

To protect you and the Fund against fraud, signatures on certain requests must have a Medallion Signature Guarantee. A Medallion Signature Guarantee verifies the authenticity of your signature. You may obtain a Medallion Signature Guarantee from most banking institutions or securities brokers but not from a notary public. Written instructions signed by all registered shareholders with a Medallion Signature Guarantee for each shareholder are required for any of the following:

- written requests to redeem \$100,000 or more;
- changes to a shareholder's record name or account registration;
- paying redemption proceeds from an account for which the address has changed within the last 30 days;
- sending redemption and distribution proceeds to any person, address or financial institution account not on record;
- sending redemption and distribution proceeds to an account with a different registration (name or ownership) from your account; and
- adding or changing ACH or wire instructions, the telephone redemption or exchange option or any other election in connection with your account.

The transfer agent reserves the right to require Medallion Signature Guarantees on all redemptions.

Accounts held by a corporation, trust, fiduciary or partnership, may require additional documentation along with a signature guaranteed letter of instruction. The Fund participates in the Paperless Legal Program (the “Program”), which eliminates the need for accompanying paper documentation on legal securities transfers. Requests received with a Medallion Signature Guarantee will be reviewed for the proper criteria to meet the guidelines of the Program and may not require additional documentation. Please contact Shareholder Services at 888-832-4386 for more information.

The sale price of each share will be the NAV next determined after the Fund (or an authorized institution) receives your request in proper form.

By Mail

To redeem shares by mail, please send a letter to the Fund signed by all registered parties on the account specifying:

- The Fund name;
- The account number;
- The dollar amount or number of shares you wish to redeem;
- The account name(s); and
- The address to which redemption (sale) proceeds should be sent.

All registered shareholders must sign the letter in the exact name(s) and must designate any special capacity in which they are registered.

Regular Mail Address

Mondrian Global Equity Value Fund
P.O. Box 588
Portland, ME 04112

Express Mail Address

Mondrian Global Equity Value Fund
c/o Atlantic Shareholder Services, LLC
Three Canal Plaza, Ground Floor
Portland, ME, 04101

The Fund does not consider the U.S. Postal Service or other independent delivery services to be its agents. Therefore, deposit in the mail or with such services of sell orders does not constitute receipt by the Fund's transfer agent. The share price used to fill the sell order is the next price calculated by the Fund after the Fund's transfer agent receives the order in proper form at its office, not at the P.O. Box provided for regular mail delivery.

By Telephone

To redeem shares by telephone, you must first establish the telephone redemption privilege (and, if desired, the wire and/or ACH redemption privilege) by completing the appropriate sections of the account application. Call 888-832-4386 to redeem your shares. Based on your instructions, the Fund will mail your proceeds to you, or send them to your bank via wire or ACH.

Receiving Your Money

Normally, the Fund will send your sale proceeds within one Business Day after it receives your redemption request. The Fund, however, may take up to seven days to pay redemption proceeds. Your proceeds can be wired to your bank account (may be subject to a \$10 fee), sent to you by check or sent via ACH to your bank account if you have established banking instructions with the Fund. The number of days following receipt of shareholder redemption requests in which the Fund typically expects to pay out redemption proceeds to redeeming shareholders generally does not differ by method of payment. **However, if you are selling shares that were recently purchased by check or through ACH, redemption proceeds may not be available until your check has cleared or the ACH transaction has been completed (which may take up to 15 days from your date of purchase).**

The Fund typically expects to sell portfolio assets and/or hold cash or cash equivalents to meet redemption requests. On a less regular basis, the Fund may also meet redemption requests by using short-term borrowings from its custodian and/or redeeming shares in-kind (as described below). These methods may be used during both normal and stressed market conditions.

Redemptions In-Kind

The Fund generally pays sale (redemption) proceeds in cash. However, under unusual conditions that make the payment of cash unwise and for the protection of the Fund's remaining shareholders, the Fund might pay all or part of your redemption proceeds in securities with a market value equal to the redemption price (redemption in-kind). If your shares were redeemed in-kind, you would have to pay transaction costs to sell the securities distributed to you, as well as taxes on any capital gains from the sale as with any redemption. In addition, you would continue to be subject to the risks of any market fluctuation in the value of the securities you receive in-kind until they are sold.

Involuntary Redemptions of Your Shares

If your account balance drops below \$50,000, you may be required to sell your shares. Involuntary redemptions will be effected only if they are deemed to be in the best interests of the Fund and its shareholders. The Fund generally will provide you at least 30 days' written notice to give you time to add to your account and avoid the involuntary redemption of your shares. The Fund reserves the right to waive the minimum account value requirement in its sole discretion.

Suspension of Your Right to Sell Your Shares

The Fund may suspend your right to sell your shares or delay payment of redemption proceeds for more than seven days during times when the NYSE is closed, other than during customary weekends or holidays, or as otherwise permitted by the SEC. More information about this is in the SAI.

How to Exchange Your Fund Shares

At no charge, you may exchange shares of any fund in the Gallery Trust for shares of another fund in the Gallery Trust by writing to or calling the Fund. Exchanges are subject to the minimum investment requirements and the fees and expenses of the fund you exchange into. You may only exchange shares between accounts with identical registrations (i.e., the same names and addresses). Although the Fund has no current intention of terminating or modifying the exchange privileges, it reserves the right to do so at any time.

The exchange privilege is not intended as a vehicle for short-term or excessive trading. The Fund may suspend or terminate your exchange privilege if you engage in a pattern of exchanges that is excessive, as determined in the sole discretion of the Fund. For more information about the Fund's policy on excessive trading, see "Excessive Trading Policies and Procedures."

Telephone Transactions

Purchasing, selling and exchanging Fund shares over the telephone is extremely convenient, but not without risk. Although the Fund has certain safeguards and procedures to confirm the identity of callers and the authenticity of instructions, the Fund is not responsible for any losses or costs incurred by following telephone instructions it reasonably believes to be genuine. If you or your financial institution transact with the Fund over the telephone, you will generally bear the risk of any loss.

Payments to Financial Intermediaries

From time to time, the Adviser and/or its affiliates, in their discretion, may make payments to certain affiliated or unaffiliated financial intermediaries to compensate them for the costs associated with distribution, marketing, administration, record-keeping and shareholder servicing support for

the Fund. These payments are sometimes characterized as “revenue sharing” payments and are made out of the Adviser’s and/or its affiliates’ own legitimate profits or other resources, and are not paid by the Fund or its shareholders. A financial intermediary may provide these services with respect to Fund shares sold or held through programs such as qualified tuition programs, fund supermarkets, fee-based advisory or wrap fee programs, bank trust programs, insurance (e.g., individual or group annuity) programs, and certain retirement plans. In addition, financial intermediaries may receive payments for making shares of the Fund available to their customers or registered representatives, including providing the Fund with “shelf space,” placing it on a preferred or recommended fund list, or promoting the Fund in certain sales programs that are sponsored by financial intermediaries. To the extent permitted by SEC and Financial Industry Regulatory Authority (“FINRA”) rules and other applicable laws and regulations, the Adviser and/or its affiliates may pay or allow other promotional incentives or payments to financial intermediaries. For more information, please see “Payments to Financial Intermediaries” in the SAI.

Any payments made to individual financial intermediaries may vary in any given year and may be negotiated on the basis of sales of Fund shares, the amount of Fund assets serviced by the financial intermediary or the quality of the financial intermediary’s relationship with the Adviser and/or its affiliates. These payments may be more or less than payments that may be received by the financial intermediaries from other mutual funds and may influence a financial intermediary to favor the sales of certain funds or share classes over others. In certain instances, the payments may be significant and may cause a conflict of interest for the financial intermediary. Any such payments will not change the NAV or price of the Fund’s shares. If you purchase shares of the Fund through a financial intermediary, please contact the financial intermediary for information about any payments it may receive in connection with the sale of Fund shares or the provision of services to Fund shareholders, as well as information about any fees and/or commissions it charges.

Other Policies

Excessive Trading Policies and Procedures

The Fund is intended for long-term investment purposes only and discourages shareholders from engaging in “market timing” or other types of excessive short-term trading. This frequent trading into and out of the Fund may present risks to the Fund’s long-term shareholders and could adversely affect shareholder returns. The risks posed by frequent trading include interfering with the efficient implementation of the Fund’s investment strategies, triggering the recognition of taxable gains and losses on the sale of Fund investments, requiring the Fund to maintain higher cash balances to meet redemption requests, and experiencing increased transaction costs.

In addition, because the Fund may invest in foreign securities traded primarily on markets that close prior to the time the Fund determines its NAV, the risks posed by frequent trading may have a greater potential to dilute the value of Fund shares held by long-term shareholders than funds investing exclusively in U.S. securities. In instances where a significant event that affects the value

of one or more foreign securities held by the Fund takes place after the close of the primary foreign market, but before the time that the Fund determines its NAV, certain investors may seek to take advantage of the fact that there will be a delay in the adjustment of the market price for a security caused by this event until the foreign market reopens (sometimes referred to as “price” or “time zone” arbitrage). Shareholders who attempt this type of arbitrage may dilute the value of the Fund’s shares if the prices of the Fund’s foreign securities do not reflect their fair value. Although the Fund has procedures designed to determine the fair value of foreign securities for purposes of calculating its NAV when such an event has occurred, fair value pricing, because it involves judgments which are inherently subjective, may not always eliminate the risk of price arbitrage.

Because the Fund may invest in small- and mid-cap securities, which often trade in lower volumes and may be less liquid, the Fund may be more susceptible to the risks posed by frequent trading because frequent transactions in the Fund’s shares may have a greater impact on the market prices of these types of securities.

The Fund’s service providers will take steps reasonably designed to detect and deter frequent trading by shareholders pursuant to the Fund’s policies and procedures described in this prospectus and approved by the Board. For purposes of applying these policies, the Fund’s service providers may consider the trading history of accounts under common ownership or control. The Fund’s policies and procedures include:

- Shareholders are restricted from making more than two (2) “round trips,” into or out of the Fund within any rolling one hundred and eighty (180) calendar day period. The Fund defines a “round trip” as a purchase or exchange into the Fund by a shareholder, followed by a subsequent redemption out of the Fund, of an amount the Adviser reasonably believes would be harmful or disruptive to the Fund.
- The Fund reserves the right to reject any purchase or exchange request by any investor or group of investors for any reason without prior notice, including, in particular, if the Fund or the Adviser reasonably believes that the trading activity would be harmful or disruptive to the Fund.

The Fund and/or its service providers seek to apply these policies to the best of their abilities uniformly and in a manner they believe is consistent with the interests of the Fund’s long-term shareholders. The Fund does not knowingly accommodate frequent purchases and redemptions by Fund shareholders. Although these policies are designed to deter frequent trading, none of these measures alone nor all of them taken together eliminate the possibility that frequent trading in the Fund will occur.

Financial intermediaries (such as investment advisers and broker-dealers) often establish omnibus accounts in the Fund for their customers through which transactions are placed. The Fund has

entered into “information sharing agreements” with these financial intermediaries, which permit the Fund to obtain, upon request, information about the trading activity of the intermediary’s customers that invest in the Fund. If the Fund or its service providers identify omnibus account level trading patterns that have the potential to be detrimental to the Fund, the Fund or its service providers may, in their sole discretion, request from the financial intermediary information concerning the trading activity of its customers. Based upon a review of that information, if the Fund or its service providers determine that the trading activity of any customer may be detrimental to the Fund, they may, in their sole discretion, request the financial intermediary to restrict or limit further trading in the Fund by that customer. If the Fund is not satisfied that the intermediary has taken appropriate action, the Fund may terminate the intermediary’s ability to transact in Fund shares. When information regarding transactions in the Fund’s shares is requested by the Fund and such information is in the possession of a person that is itself a financial intermediary to a financial intermediary (an “indirect intermediary”), any financial intermediary with whom the Fund has an information sharing agreement is obligated to obtain transaction information from the indirect intermediary or, if directed by the Fund, to restrict or prohibit the indirect intermediary from purchasing shares of the Fund on behalf of other persons.

The Fund and its service providers will use reasonable efforts to work with financial intermediaries to identify excessive short-term trading in omnibus accounts that may be detrimental to the Fund. However, there can be no assurance that the monitoring of omnibus account level trading will enable the Fund to identify or prevent all such trading by a financial intermediary’s customers. Please contact your financial intermediary for more information.

Customer Identification and Verification

To help the government fight the funding of terrorism and money laundering activities, federal law requires all financial institutions to obtain, verify, and record information that identifies each person who opens an account.

What this means to you: when you open an account, the Fund will ask your name, address, date of birth, and other information that will allow the Fund to identify you. This information is subject to verification to ensure the identity of all persons opening a mutual fund account.

The Fund is required by law to reject your new account application if the required identifying information is not provided.

In certain instances, the Fund is required to collect documents to fulfill its legal obligation. Documents provided in connection with your application will be used solely to establish and verify your identity.

Attempts to collect the missing information required on the application will be performed by either contacting you or, if applicable, your broker or financial intermediary. If this information cannot

be obtained within a reasonable timeframe established in the sole discretion of the Fund, your application will be rejected.

Subject to the Fund's right to reject purchases as described in this prospectus, upon receipt of your application in proper form (or upon receipt of all identifying information required on the application), your investment will be accepted and your order will be processed at the next-determined NAV per share.

The Fund reserves the right to close or liquidate your account at the NAV next-determined and remit proceeds to you via check if it is unable to verify your identity. Attempts to verify your identity will be performed within a reasonable timeframe established in the sole discretion of the Fund. Further, the Fund reserves the right to hold your proceeds until your original check clears the bank, which may take up to 15 days from the date of purchase. In such an instance, you may be subject to a gain or loss on Fund shares and will be subject to corresponding tax implications.

Anti-Money Laundering Program

Customer identification and verification is part of the Fund's overall obligation to deter money laundering under federal law. The Fund has adopted an anti-money laundering compliance program designed to prevent the Fund from being used for money laundering or the financing of illegal activities. In this regard, the Fund reserves the right to: (i) refuse, cancel or rescind any purchase or exchange order; (ii) freeze any account and/or suspend account services; or (iii) involuntarily close your account in cases of threatening conduct or suspected fraudulent or illegal activity. These actions will be taken when, in the sole discretion of Fund management, they are deemed to be in the best interest of the Fund or in cases when the Fund is requested or compelled to do so by governmental or law enforcement authority. If your account is closed at the request of governmental or law enforcement authority, you may not receive proceeds of the redemption if the Fund is required to withhold such proceeds.

Unclaimed Property

Each state has unclaimed property rules that generally provide for escheatment (or transfer) to the state of unclaimed property under various circumstances. Such circumstances include inactivity (e.g., no owner-initiated contact for a certain period), returned mail (e.g., when mail sent to a shareholder is returned by the post office, or "RPO," as undeliverable), or a combination of both inactivity and returned mail. Once it flags property as unclaimed, the Fund will attempt to contact the shareholder, but if that attempt is unsuccessful, the account may be considered abandoned and escheated to the state.

Shareholders that reside in the state of Texas may designate a representative to receive escheatment notifications by completing and submitting a designation form that can be found on the website of the Texas Comptroller. While the designated representative does not have any rights to claim or

access the shareholder's account or assets, the escheatment period will cease if the representative communicates knowledge of the shareholder's location and confirms that the shareholder has not abandoned his or her property. A completed designation form may be mailed to the Fund (if shares are held directly with the Fund) or to the shareholder's financial intermediary (if shares are not held directly with the Fund).

More information on unclaimed property and how to maintain an active account is available through your state or by calling 888-832-4386.

Dividends and Distributions

The Fund distributes its net investment income, and makes distributions of its net realized capital gains, if any, at least annually. If you own Fund shares on the Fund's record date, you will be entitled to receive the distribution. The amount of any distribution will change and there is no guarantee that the Fund will declare and pay dividend income or distribute a capital gain.

You will receive dividends and distributions in the form of additional Fund shares unless you elect to receive payment in cash. To elect cash payment, you must notify the Fund in writing prior to the date of the distribution. Your election will be effective for dividends and distributions paid after the Fund receives your written notice. To cancel your election, simply send the Fund written notice.

Taxes

Please consult your tax advisor regarding your specific questions about U.S. federal, state and local income taxes. Below is a summary of some important U.S. federal income tax issues that affect the Fund and its shareholders. This summary is based on current tax laws, which may change. This summary does not apply to shares held in an IRA or other tax-qualified plans, which are generally not subject to current tax. Transactions relating to shares held in such accounts may, however, be taxable at some time in the future.

The Tax Cuts and Jobs Act (the "Tax Act") made significant changes to the U.S. federal income tax rules for taxation of individuals and corporations, generally effective for taxable years beginning after December 31, 2017. Many of the changes applicable to individuals are temporary and only apply to taxable years beginning after December 31, 2017 and before January 1, 2026. There are only minor changes with respect to the specific rules applicable to a regulated investment company, such as the Fund. The Tax Act, however, made numerous other changes to the tax rules that may affect shareholders and the Fund. You are urged to consult your own tax advisor regarding how the Tax Act affects your investment in the Fund.

The Fund intends to distribute substantially all of its net investment income and net realized capital gains, if any. The dividends and distributions you receive may be subject to federal, state, and local taxation, depending upon your tax situation. Distributions you receive from the Fund may be

taxable whether you receive them in cash or you reinvest them in additional shares of the Fund. Income distributions, including distributions of net short-term capital gains but excluding distributions of qualified dividend income, are generally taxable at ordinary income tax rates. Long-term capital gains distributions and distributions that are reported by the Fund as qualified dividend income are generally taxable at the rates applicable to long-term capital gains and currently set at a maximum tax rate for individuals of 20% (lower rates apply to individuals in lower tax brackets). Once a year the Fund (or its administrative agent) will send you a statement showing the types and total amount of distributions you received during the previous year. The Fund's investment strategies may limit its ability to distribute dividends eligible to be treated as qualified dividend income.

You should note that if you purchase shares just before a distribution, the purchase price would reflect the amount of the upcoming distribution. In this case, you would be taxed on the entire amount of the distribution received, even though, as an economic matter, the distribution simply constitutes a return of your investment. This is known as "buying a dividend" and should be avoided by taxable investors.

Each sale of Fund shares may be a taxable event. For tax purposes, an exchange of your Fund shares for shares of a different fund is the same as a sale. The gain or loss on the sale of Fund shares generally will be treated as a short-term capital gain or loss if you held the shares for 12 months or less or as long-term capital gain or loss if you held the shares for longer. Any loss realized upon a taxable disposition of Fund shares held for six months or less will be treated as long-term, rather than short-term, to the extent of any long-term capital gain distributions received (or deemed received) by you with respect to the Fund shares. All or a portion of any loss realized upon a taxable disposition of Fund shares will be disallowed if you purchase other substantially identical shares within 30 days before or after the disposition. In such a case, the basis of the newly purchased shares will be adjusted to reflect the disallowed loss.

U.S. individuals with income exceeding \$200,000 (\$250,000 if married and filing jointly) are subject to a 3.8% Medicare contribution tax on their "net investment income," including interest, dividends, and capital gains (including capital gains realized on the sale or exchange of shares of the Fund).

The Fund (or its administrative agent) must report to the Internal Revenue Service ("IRS") and furnish to Fund shareholders cost basis information for Fund shares. In addition to reporting the gross proceeds from the sale of Fund shares, the Fund is also required to report the cost basis information for such shares and indicate whether these shares had a short-term or long-term holding period. For each sale of Fund shares, the Fund will permit shareholders to elect from among several IRS-accepted cost basis methods, including the average cost basis method. In the absence of an election, the Fund will use the average basis method as the default cost basis method. The cost basis method elected by the Fund shareholder (or the cost basis method applied by default) for each sale of Fund shares may not be changed after the settlement date of each such sale of Fund shares. Fund

shareholders should consult with their tax advisors to determine the best IRS-accepted cost basis method for their tax situation and to obtain more information about how cost basis reporting applies to them. Shareholders also should carefully review the cost basis information provided to them by the Fund and make any additional basis, holding period or other adjustments that are required when reporting these amounts on their federal income tax returns.

The Fund may be subject to foreign withholding taxes with respect to dividends or interest the Fund received from sources in foreign countries. If more than 50% of the total assets of the Fund consist of foreign securities, the Fund will be eligible to and intends to file an election to treat some of those taxes as a distribution to shareholders, which would allow shareholders to offset some of their U.S. federal income tax. The Fund (or its administrative agent) will notify you if it makes such an election and provide you with the information necessary to reflect foreign taxes paid on your income tax return.

Because each shareholder's tax situation is different, you should consult your tax advisor about the tax implications of an investment in the Fund.

More information about taxes is in the SAI.

Additional Information

The Trust enters into contractual arrangements with various parties, including, among others, the Fund's investment adviser, custodian, transfer agent, accountants, administrator and distributor, who provide services to the Fund. Shareholders are not parties to, or intended (or "third-party") beneficiaries of, any of those contractual arrangements, and those contractual arrangements are not intended to create in any individual shareholder or group of shareholders any right to enforce the terms of the contractual arrangements against the service providers or to seek any remedy under the contractual arrangements against the service providers, either directly or on behalf of the Trust.

This prospectus and the SAI provide information concerning the Trust and the Fund that you should consider in determining whether to purchase shares of the Fund. The Fund may make changes to this information from time to time. Neither this prospectus, the SAI or any document filed as an exhibit to the Trust's registration statement, is intended to, nor does it, give rise to an agreement or contract between the Trust or the Fund and any shareholder, or give rise to any contract or other rights in any individual shareholder, group of shareholders or other person other than any rights conferred explicitly by federal or state securities laws that may not be waived.

Financial Highlights

Because the Fund has not commenced operations as of the date of this prospectus, financial highlights are not available.
