Since Inception (July 1, 2016 annualized)	3.70	3.14	6.20	2.36

International Equity Strategy	Composite (Gross)	Composite (Net)	MSCI EAFE	MSCI EAFE (Value)
Quarter 3, 2020	1.28	1.14	4.80	1.19
1 Year	-9.86	-10.35	0.49	-11.93
5 Years (annualized)	2.62	2.06	5.26	1.14
Since Inception (October 1, 1991 annualized)	7.34	6.75	5.04	N/A

Philosophy

We invest in stocks where rigorous dividend discount analysis isolates value in terms of the long-term flow of dividends. Dividend yield and future real growth play a central role in our decision making process and over time the dividend component is expected to be a meaningful portion of expected total return.

Benefits of Our Approach

Mondrian's approach seeks to provide three key investment benefits:

1. A rate of return meaningfully greater than the client's domestic rate of inflation
2. Preservation of capital during protracted global market declines
3. Less volatile portfolio performance than international equity benchmarks and other international equity managers

To this value-based approach, the International Equity ESG product also adds principles-based environmental, social and governance considerations.

Investment Process

A value-oriented dividend discount analysis that isolates value at the individual security, sector and market levels.

- Long-term purchasing power parity approach, supplemented by shorter-term probability assessment
- Long-term fundamental research is strongly emphasized; an extensive program of company and market visits enhances qualitative and quantitative research
- Informed by Mondrian's proprietary ESG Summary Report, the International Equity ESG product includes principles-based capital allocation

Quarterly Update

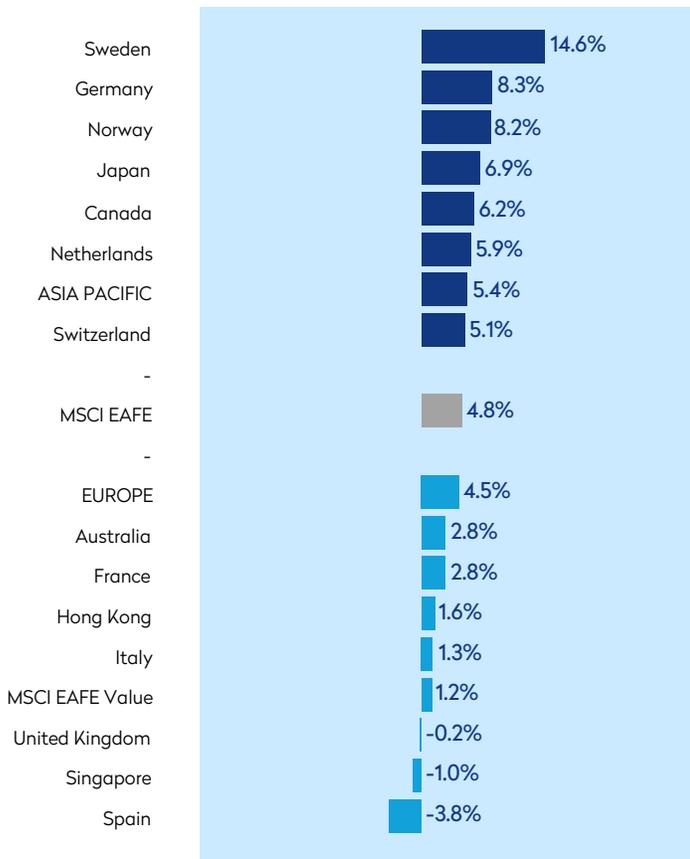

International equities continued to recover in the third quarter. Despite rising COVID-19 cases globally and ongoing geopolitical tensions, equities were supported by better-than-feared corporate earnings and economic data, promising progress on potential vaccines, M&A, and further economic stimulus. Asia Pacific markets led as the region continued to lead the way in controlling the spread of COVID-19; in contrast, some European countries have begun to suffer from a second wave. Fears of potential further lockdowns weighed particularly on the energy and financials sectors but other cyclical sectors posted gains. All major developed market international currencies appreciated against the US dollar.

In a strong quarter for markets and another tough quarter for value investors, Net Composite returns lagged the MSCI EAFE index, but exceeded the value sub-index. Returns from MSCI EAFE Growth have now exceeded MSCI EAFE Value by 28% year-to-date and by 8% annualized over the last five years.

Selected Currency and Sector Returns

Performance Attribution

	Relative Effects	Negative Contributors	Positive Contributors
Country Allocation	Added	Overweight UK Overweight Austria	Exposure to Taiwan Overweight Japan
Stock Selection	Held back	Japan Denmark	UK
Significant Stock Contributors		Banco Santander Andritz Lloyds Bank	TSMC Kingfisher Saint Gobain
Currency Allocation	Slightly held back	Overweight Japanese yen	Underweight Swiss franc

International Equity ESG Portfolio

• Country allocation added to relative returns, driven by exposure to Taiwan

The positive impact of exposure to Taiwan and the overweight position in the strong Japanese equity market more than offset the overweight position in the weak UK equity market.

Uncertainty about ongoing Brexit negotiations and a resurgence in COVID-19 cases weighed on the UK market. In contrast, relative success in controlling COVID-19 and strong corporate balance sheets supporting resilient dividend payments continued to support the Japanese market. Continuity candidate and former Cabinet Secretary Yoshihide Suga took over as Japanese prime minister after Shinzo Abe retired due to ill health.

• Stock selection in Japan weighed on relative returns

Stock selection in Japan held back relative returns. Honda, the Japanese automotive and motorcycle manufacturer, declined as conservative earnings guidance disappointed investors.

In contrast, Kingfisher and Saint Gobain continued to rise, up over 70% in the last six months; both stocks were supported by the ongoing recovery in construction and DIY demand. TSMC, the Taiwanese semiconductor manufacturer, gained a further 42%, boosted by Intel looking to outsource production and continued strong results and guidance.

• Relative returns were supported by the lack of exposure to the energy sector

The positive impact from the lack of exposure in the weak energy sector more than offset the underweight position in the strong materials sector.

However, stock selection within sectors held back relative returns. Although the portfolio benefitted from strong stock selection in the IT and consumer discretionary sectors, this was more than offset by stock selection in the financials and industrials sectors.

• Currency allocation slightly detracted from relative returns

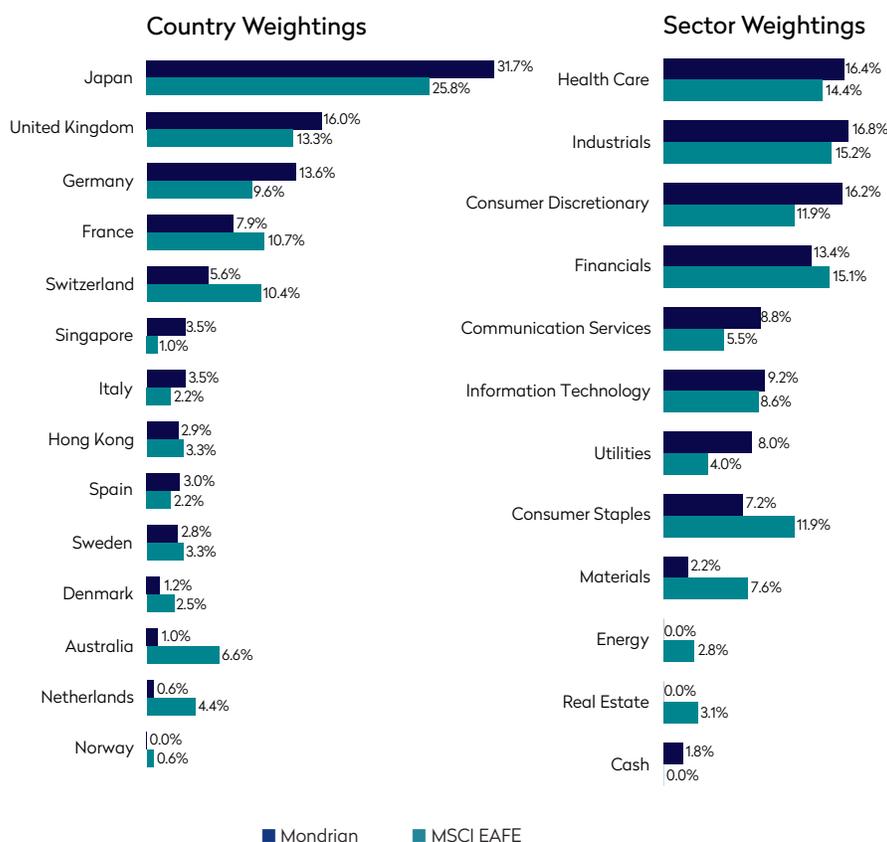

All international currencies appreciated against the US dollar. The positive impact of the underweight position in the relatively weak Swiss franc was more than offset by the overweight exposure to the Japanese yen.

Investment Strategy

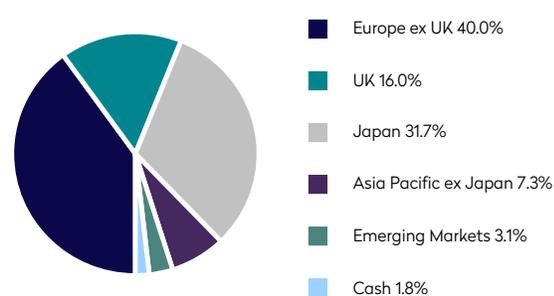

Mondrian's bottom-up fundamental research process utilizes a long-term dividend discount model to isolate value at the individual security level, in an approach that makes valuations comparable across differing markets and sectors. The following positioning is a consequence of this investment philosophy:

	Overweight Positions	Underweight Positions
Country Positioning	Asia Pacific Select European markets	Australia Switzerland
Sector Positioning	Communication services Utilities Consumer discretionary	Materials Consumer staples Energy
	Adherence to ESG guidelines	

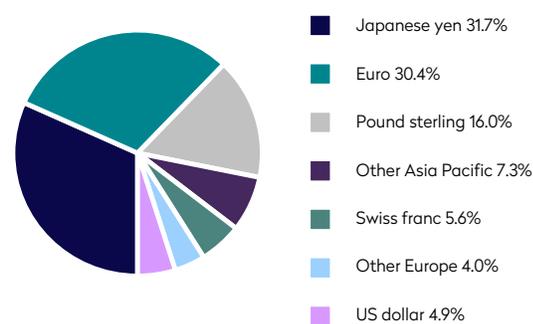

Portfolio Composition

Currency Exposure

Characteristics

	Mondrian	MSCI EAFE
Number of Holdings	52	902
Weighted Average Market Cap	\$51.0 billion	\$62.9 billion
Median Market Cap	\$23.5 billion	\$10.1 billion
Price-to-Earnings	14.8x	20.2x
Price-to-Book	1.1x	1.6x
Dividend Yield	3.2%	2.7%

MSCI EAFE – The MSCI EAFE Index (Europe, Australasia, Far East) is a free float adjusted market capitalization index that is designed to measure the equity market performance of developed markets, excluding the US and Canada.

Index returns are shown with net dividends reinvested.

Weighted Average Market Cap – The portfolio-weighted average market capitalizations of all equity securities.

Portfolio Turnover – A measure of how frequently assets within a fund are bought and sold by the managers.

Price-to-Earnings – The Price to Earnings Ratio is a stock’s current price divided by the company’s trailing 12-month earnings per share from continuous operations.

Price-to-Book – The Price to Book Ratio links the stock/share price of a company with the book or accounting value of shareholders’ equity per share.

Dividend Yield – The Dividend Yield is the portfolio-weighted average of the annualized gross dividend per share figure of all portfolio holdings.

Portfolio Managers

Elizabeth A. Desmond
 Director and Chief Investment Officer
 International Equities

Alex Simcox
 Senior Portfolio Manager

Christopher Davis
 Portfolio Manager

Mondrian utilizes a team approach to making investment decisions at the strategy level, with input from across the International Equity team. The individuals mentioned above make the final decisions for the International Equity ESG product.

Important Notes and Disclosures

1. Mondrian claims compliance with the Global Investment Performance Standards (GIPS®). Mondrian is a value-oriented defensive manager seeking to achieve high real returns for its clients. All products utilize an income-oriented value discipline. Mondrian's methodology is applied consistently to markets and individual securities, both bonds and equities. Please note that this Quarterly Update references data from both the International Equity Composite and the International Equity ESG Composite. The International Equity Composite includes US dollar based discretionary fee paying portfolios, measured against the MSCI EAFE Index net of US withholding taxes. The International Equity Composite portfolios are invested in non-US based equities with the allowance for hedging. The International Equity ESG Composite includes US dollar based discretionary fee paying portfolios, measured against the MSCI EAFE Index net of US withholding taxes. The International Equity ESG Composite portfolios are invested in non-US based equities with the allowance for hedging, and environmental, social and governance principles-based exclusions are applied to portfolio construction. The MSCI EAFE Index assumes the reinvestment of dividends after the deduction of withholding tax and approximates the minimum possible dividend re-investment. To receive a complete list and description of composites and/or a presentation that adheres to the GIPS standards, contact Mondrian Investment Partners (U.S.), Inc at 215-825-4500.
2. Neither MSCI nor any other party involved in or related to compiling, computing or creating the MSCI data makes any express or implied warranties or representations with respect to such data (or the results to be obtained by the use thereof), and all such parties hereby expressly disclaim all warranties of originality, accuracy, completeness, merchantability or fitness for a particular purpose with respect to any of such data. Without limiting any of the foregoing, in no event shall MSCI, any of its affiliates or any third party involved in or related to compiling, computing or creating the data have any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages. No further distribution or dissemination of the MSCI data is permitted without MSCI's express written consent.
3. This Quarterly Update contains supplemental information which complements the Mondrian International Equity Composite or the Mondrian International Equity ESG Composite GIPS compliant presentations. Additional information is available upon request.
4. Total Strategy Assets may consist of multiple composites for the International Equity strategy. Performance for the main composite is shown. Accounts may not be included in the main composite for reasons such as client domicile or client specific investment restrictions. The International Equity ESG product is included in the International Equity Total Strategy Assets.
5. Calculations for P/E, P/B, dividend yield, sector country allocations and market caps are based on generally accepted industry standards. All characteristics are based on a representative account and derived by first calculating the characteristics for each security, and then calculating the weighted-average of these values. The details of exact calculations can be provided upon request.
6. Past performance is not indicative of future results. An investment involves the risk of loss. The investment return and value of investments will fluctuate.
7. There can be no assurance that the investment objectives of the strategy will be achieved.
8. All characteristic data provided is produced using Mondrian's accounting system data.
9. Performance results marked "Gross" do not reflect deduction of investment advisory fees but are net of transaction costs and withholding tax. Investment returns will be reduced accordingly. Performance returns marked "Net" reflect deduction of investment advisory fees and are calculated by deducting a quarterly indicative fee from the quarterly composite return. The indicative fee is defined as being the effective fee rate (or average weighted fee) at the composite's minimum account size. Actual net composite performance may be higher than the indicative net performance shown because some accounts may have sliding fee scales and therefore lower effective fee rates.
10. Views expressed were current as of the date indicated, are subject to change, and may not reflect current views. Views should not be considered a recommendation to buy, hold or sell any security and should not be relied on as research or investment advice.
11. This Quarterly Update may include forward-looking statements. All statements other than statements of historical facts are forward-looking statements (including words such as "believe," "estimate," "anticipate," "may," "will," "should," "expect"). Although we believe that the expectations reflected in such forward-looking statements are reasonable, we can give no assurance that such expectations will prove to be correct. Various factors could cause actual results or performance to differ materially from those reflected in such forward-looking statements.
12. This introductory material is for informational purposes only and is not an offer or solicitation with respect to any securities. Any offer of securities can only be made by written offering materials, which are available solely upon request, on an exclusively private basis and only to qualified financially sophisticated investors. The information set forth herein is a summary only and does not set forth all of the risks associated with the investment strategy described herein. 10. For institutional investors and professional financial advisers only.
13. For institutional investors and professional financial advisers only.
14. It should not be assumed that investments made in the future will be profitable or will equal the performance of any security referenced in this piece. Examples of securities bought or sold may not represent a complete list of all transactions in the period. Holdings are subject to change.
