Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Mondrian Emerging Markets Equity Fund (previously Mondrian Focused Emerging Markets Equity Fund), a sub-fund of Mondrian Funds plc - ISIN IE00B8GBK575

Objectives and Investment Policy

The Mondrian Emerging Markets Equity Fund (the **Fund**) aims to achieve long-term total return.

The Fund intends to invest primarily in a small number of emerging market equity securities. The Fund will typically hold a portfolio of approximately 40-60 securities at any one time. The future value of dividends will also be considered when choosing shares for the Fund. The Fund's investment approach means it can invest significantly in particular companies and industries which may impact the value of your investment. This means it will typically hold fewer investments than other funds.

An Emerging Country is considered to be any country except the United States, Canada and those in the Morgan Stanley Capital International EAFE Index. The Fund may invest in a corporate issuer that has one or more of the following characteristics: (1) the principal securities trading market is an Emerging Country; (2) alone or on a consolidated basis, 50% or more of its annual revenues or annual profits from goods produced, sales made or services performed in Emerging Countries; (3) the company has 50% or more of its assets located in an Emerging Country; or (4) it is organised under the laws of, and has a principal office in an Emerging Country.

The Fund's base currency is US dollars and the Fund may but is not obliged to use currency hedging (the technique of buying or selling currencies to minimise fluctuations in non-dollar currency

investments resulting from foreign exchange movements). There is no guarantee that this will be successful.

The Fund's investment performance will be measured against the MSCI Emerging Market Index. In order to seek to take advantage of specific investment opportunities, the Investment Manager has discretion to vary the weightings of equities to that of the benchmark and invest in equities which are not included in the benchmark. By way of example, as at 31 December 2020, the Fund's active share (a measure of how the Fund's composition differs from that of the benchmark) was 76.56%.

Any income that may arise in the Fund will be reinvested in the Fund.

You can buy or sell shares daily (but not on weekends or bank holidays in the UK or Ireland). Orders to buy can be made by submitting a request by 5:00p.m. (Irish time), 3 business days in advance, to the administrator. Orders to sell can be made by submitting a request by 5:00p.m. (Irish time), 2 business days in advance to the administrator.

Investment in the Fund may be suitable for investors with a long term investment horizon. For full investment objectives and policy details, please refer to the section entitled "Investment Objectives and Policies of the Funds" in the Supplement to the Prospectus for the Fund.

Risk and Reward Profile

Lower Risk ← **Higher Risk**
Typically lower rewards Typically higher rewards

The risk and reward indicator is based on historical data and may not be a reliable indication for the future. The risk and reward category shown is not guaranteed to remain unchanged and may change over time.

The lowest category does not mean that a share class is risk free and your initial investment is not guaranteed. The Fund is in category 6 because of the moderate to high range and frequency of price movements of the underlying investments the Fund invests in. The value of your investment in the Fund may be affected by the following risks:

- Emerging markets investments are more volatile and present higher risk than investments in more established markets.
- Such markets carry additional risks such as political instability, weaker auditing and financial reporting standards and less government supervision and regulation.
- The Fund's investments may be in currencies other than US dollars. The impact of this is that as the value of a currency rises or falls it can have a positive or negative impact on the value of the Fund's investments.
- As a portfolio with approximately 40-60 securities, the Fund's volatility may be greater than in a more diversified fund with a greater number of investments.
- The Fund can invest in financial derivative instruments. These instruments have additional risks such as legal risk or liquidity risk (the inability to sell the contract due to lack of buyers in the market). These risks can have adverse impacts on the overall value of the Fund.

For a complete overview of all risks attached to this Fund, refer to the section entitled "Risk Factors" in the Fund's Supplement and the Mondrian Funds plc Prospectus.

Charges for this Fund

The charges you pay are used to pay the costs of running the Fund including the marketing and distributing of the Fund. These charges reduce the potential growth of your investment.

The Entry and Exit Charges shown are the maximum figures. In some cases you may pay less. Please refer to the Administrator for the actual Entry and Exit Charges.

One off Charges taken before or after you invest
