Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Mondrian Global Green Bond Fund – EUR Unhedged a sub-fund of Mondrian Funds plc - ISIN IE00BMHKTP42

Objectives and Investment Policy

The Mondrian Global Green Bond Fund (the **Fund**) aims to generate returns consistent with the preservation of principal and the generation of income and capital growth over the long term with a focus on investment in green bonds.

The Fund intends to invest primarily in a broad range of fixed and/or floating rate debt securities (such as notes and bonds) of governments, their agencies, instrumentalities or political subdivisions and companies, which the Investment Manager classifies as green bonds. The Investment Manager defines green bonds as any type of bond instrument where the proceeds will be applied to finance or refinance in part or in full new and/or existing projects that the Investment Manager believes are beneficial to the environment which include but would not be limited to climate change mitigation and adaptation, natural resource and biodiversity conservation and pollution prevention and control. It is intended that in normal market conditions that at least 75% of the Fund's Net Asset Value will be invested in green bonds, as defined by the Investment Manager.

The debt securities the Fund invests in will generally be rated BBB- or better by Standard & Poor's or Baa3 or better by Moody's Investors Service or if unrated, be deemed to be of comparable quality by the Investment Manager. The Fund may also invest in debt securities which are below investment grade. The Fund's exposure to sub-investment grade securities will not account at the time of purchase for more than 25% of the Fund's Net Asset Value.

The Fund may also invest up to 10% at the time of purchase of its Net Asset Value in emerging markets debt. This is defined as securities guaranteed and/or issued by a government, government agency or instrumentality, sovereign, supranational organization, corporation or special purpose entity whose currency is not included within the Bloomberg Barclays Global Aggregate Bond Index.

To assist the Investment Manager in determining what is a green bond, the Investment Manager may use one or more independent research services to provide information and evaluations. The Investment Manager may use other sources and considerations in making its investment decisions.

The Fund's base currency is in Euros and the Fund may but it is not obliged to use currency hedging (the technique of buying or selling currencies to minimise fluctuations in non-Euro denominated currency investments resulting from foreign exchange movements).

The Fund will be actively managed and the Fund's investment performance will be measured against the Bloomberg Barclays MSCI Green Bond Index unhedged in Euro terms. In order to seek to take advantage of specific investment opportunities, the Investment Manager has discretion to vary the weightings of bonds to that of the benchmark and invest in bonds which are not included in the benchmark. By way of example, as at 31 December 2020, the Fund's active share (a measure of how the Fund's composition differs from that of the benchmark) was 80.01%.

Any income that may arise in the Fund will be reinvested in the Fund.

You can buy or sell shares daily (but not on weekends or bank holidays in the UK or Ireland). Orders to buy can be made by submitting a request by 5:00p.m. (Irish time), 3 business days in advance, to the administrator. Orders to sell can be made by submitting a request by 5:00p.m. (Irish time), 2 business days in advance to the administrator.

Investment in the Fund may be suitable for investors seeking total return together with the preservation of capital over the medium term (3-5 years) and who are prepared to accept a moderate level of volatility. For full investment objectives and policy details, please refer to the section entitled "Investment Objectives and Policies of the Funds" in the Supplement to the Prospectus for the Fund.

Risk and Reward Profile

Lower Risk ← **Higher Risk**
Typically lower rewards Typically higher rewards

As the Fund launched in September 2020, there is insufficient history to provide a useful indication of the risk and reward profile for the Fund. As such, where the available Fund data falls short of 5 years, the indicator shown above uses data from the Bloomberg Barclays MSCI Green Bond Index.

The risk and reward indicator is based on historical data and may not be a reliable indicator for the future. The risk and reward category shown is not guaranteed to remain unchanged and may change over time.

The lowest category does not mean that a share class is risk free and your initial investment is not guaranteed. The Fund is in category 3 because of the moderate to low range and frequency of price movements of the underlying investments within the Benchmark. The value of your investment in the Fund may be affected by the following risks:

- As the Fund invests in debt securities (e.g. bonds) it is subject to credit risk (the risk of a bond issuer failing to pay), liquidity risk and interest rate risk (the risk of changes in interest rates).
- The Fund's investments may be in currencies other than the Euro. The impact of this is that as the value of a currency rises or falls it can have a positive or negative impact on the value of the Fund's investments.
- The Fund can invest in financial derivative instruments. These instruments have additional risks such as legal risk or liquidity risk (the inability to sell the contract due to lack of buyers in the market). These risks can have adverse impacts on the overall value of the Fund.

- For a complete overview of all risks attached to this Fund, refer to the section entitled “Risk Factors” in the Fund’s Supplement and the Mondrian Funds plc Prospectus.
