Notes:

^{1,3}Allocation in representative account. Absent client restrictions, allocations are consistent across all client portfolios with the same mandate type. Bond exposures are calculated in duration weighted terms.

Where bond exposure is shown, this represents the portfolio's exposure to bonds issued in that currency. Where currency exposure is shown, this represents the portfolio's exposure to bonds, cash and forward positions denominated in that currency.

^{2,4}Active weight exposure (Mondrian weight minus index weight).

The pie chart below for the Mondrian representative account has been constructed using the index rating methodology.

Important Notes and Disclosures

Mondrian claims compliance with the Global Investment Performance Standards (GIPS®). Mondrian is a value-oriented defensive manager seeking to achieve high real returns for its clients. All products utilize an income-oriented value discipline. Mondrian's methodology is applied consistently to markets and individual securities, both bonds and equities. The Global Debt Opportunities Fixed Income Composite includes US dollar based discretionary fee paying portfolios, measured against a customised index consisting of the monthly US dollar returns of the FTSE WGBI (80% weighting) and the JP Morgan GBI EM Global Diversified Index (20% weighting) gross of withholding taxes (previously measured against a customised index consisting of the monthly US dollar returns of the JP Morgan GGBI (80% weighting) and the JP Morgan GBI EM Global Diversified Index (20% weighting) gross of withholding taxes to January 1, 2017). The portfolios are invested in global bonds and target a 20% exposure to emerging market debt. To receive a complete list and description of composites and/or a presentation that adheres to the GIPS standards, contact Mondrian Investment Partners Limited +44 (0)207 477 7000.

Calculations for yield to maturity, modified duration, average maturity, average quality and country allocations are based on generally accepted industry standards. All characteristics are based on a representative account and derived by first calculating the characteristics for each security, and then calculating the weighted-average of these values. The details of exact calculations can be provided upon request.

Past performance is not indicative of future results. An investment involves the risk of loss. The investment return and value of investments will fluctuate.

There can be no assurance that the investment objectives of the strategy will be achieved.

All characteristic data provided is produced using Mondrian's accounting system data.

Performance results marked "Gross" do not reflect deduction of investment advisory fees but are net of transaction costs and withholding tax. Investment returns will be reduced accordingly. Performance returns marked "Net" reflect deduction of investment advisory fees and are calculated by deducting a quarterly indicative fee from the quarterly composite return. The indicative fee is defined as being the effective fee rate (or average weighted fee) at the composite's minimum account size. Actual net composite performance would be higher than the indicative net performance shown because some accounts have sliding fee scales and therefore lower effective fee rates.
