

Mondrian U.S. Small Cap Equity Fund

MPUSX

Fund Objective

The Fund seeks long-term total return.

Fund Strategy

The Fund invests primarily in equity securities of U.S. small-capitalization companies. Mondrian applies a defensive, value-oriented process that seeks to identify undervalued securities that we believe will provide strong excess returns over a full market cycle.

Fundamental research is strongly emphasized. Extensive contact with companies enhances qualitative and quantitative desk research, both prior to the purchase of a stock and after its inclusion in the portfolio.

The Fund is subject to market risks. Mondrian's approach focuses on providing a rate of return meaningfully greater than the client's domestic rate of inflation. Our Fund seeks to preserve capital during protracted global market declines.

- With 30 years of stable leadership and growth, we have an established team of dedicated and focused professionals working on the behalf of investors.
- As a UK-based, global investment manager, we believe we bring a unique and differentiated approach to evaluating US small cap companies and constructing portfolios.
- Over Mondrian's history of international investing for global clients, we have built up considerable understanding of the effects of currency movements. This is valuable in discussions with US companies with overseas exposure.

Fund Performance

	Quarter	YTD	1 Year	Since Inception *
Mondrian U.S. Small Cap Equity Fund	0.65%	14.50%	44.76%	10.85%
Russell 2000	4.29%	17.54%	62.03%	23.05%
Russell 2000 Value	4.56%	26.69%	73.28%	18.77%

* Fund Inception December 17, 2018. Periods over one year are annualized
 The performance data quoted represents past performance. Past performance is no guarantee of future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost and current performance may be lower or higher than performance quoted. Total Net Assets	\$1.6m
Ticker Symbol	MPUSX
CUSIP	36381Y504
NAV	\$12.48
Net Expense Ratio	0.90%
Gross Expense Ratio	7.14%

Russell 2000 - The Russell 2000 Index is a free float-adjusted market capitalization-weighted stock market index of approximately the bottom 2,000 stocks in the Russell 3000 Index. It is a widely used index for US small capitalization stocks.

Russell 2000 Value - The Russell 2000 Value Index is a free float-adjusted market capitalization-weighted stock market index which is made up of a subset of stocks from the Russell 2000 index. The stocks included are assessed by Russell to possess value characteristics. Russell constructs its style indices using three variables: book-to-price, IBES forecast medium-term growth and historical sales per share growth.

Mondrian Investment Partners Limited (the "Adviser") has contractually agreed to waive fees and reimburse expenses to the extent necessary to keep Total Annual Fund Operating Expenses (excluding interest, taxes, brokerage commissions, acquired fund fees and expenses and non-routine expenses) from exceeding 0.90% of the Fund's average daily net assets until February 28, 2023.

Investment Strategy

The main highlights of the strategy being adopted for the Fund are:

- A focus on well managed companies with robust balance sheets and attractive valuations.
- Overweight positions in selected sectors (Industrials and Materials), according to valuations.
- Preference for businesses with high recurring revenue streams, potentially offering greater earnings visibility.

Fund Characteristics

	Fund	Russell 2000

TOTAL		26.9%

Holdings are subject to change.

Weighted Average Market Cap - The portfolio-weighted average market capitalizations of all equity securities. Median Market Cap - The median market capitalization of all equity securities. Price to Earnings - The Price to Earnings Ratio is a stock's current price divided by the company's trailing 12-month earnings per share from continuous operations. Price to Book - The Price to Book Ratio links the stock/share price of a company with the book or accounting value of shareholders' equity per share. Price to Cash Flow - The Price to Cash Flow Ratio is the ratio of a stock's price to its cash flow per share.

Sector returns are calculated by Mondrian using generally accepted industry standards and use the Global Industry Classification Standard (GICS®).

Performance Review

- The Russell 2000 Index recorded additional gains in the second quarter, adding 4.29%.
- Data released in the period confirmed that economic growth accelerated during the first quarter. Headline inflation numbers also picked up, which caused some investors to question whether the Fed will need to tighten its monetary policy sooner than planned. Meanwhile, President Biden lent his support to a \$1.2tn infrastructure proposal from a bipartisan group of senators. While Congress had yet to ratify the plan, industry pundits were confident that a deal would be reached.
- Communication Services led sector returns during the quarter, rising 33.3%, reflecting short-term optimism about the so-called reopening of the US economy. Energy also logged double-digit gains, finishing up 20.7%. Rising oil prices helped drive share price growth in the non-renewable energy subsector.
- The Utilities sector generated the only negative return, falling 1.6%. Industrials and Financials also significantly trailed the broader index, albeit adding 0.4% and 0.8% respectively. As so-called bond proxies, Utilities and Financials tend to underperform when inflationary pressures build. Within Industrials, the Transportation subsector weighed on total sector performance.
- The US Small Cap portfolio underperformed the benchmark index by 3.50%.
 - In the context of sustained market strength, the defensively-positioned portfolio trailed the benchmark index. Sector allocation effects were mixed. Nevertheless, overall asset allocation held back investment performance. This was notably influenced by an overweight exposure to Industrials, which underperformed the broader index. Stock selection also detracted from performance. Within Information Technology, certain higher growth semiconductor and consumer electronics-related stocks lagged, possibly reflecting a view that higher inflation will persist. Other holdings such as those within Health Care as well as a number of Financials stocks contributed positively.

To determine if the Fund is an appropriate investment for you, carefully consider the Fund's investment objectives, risk, and charges and expenses. This and other information can be found in the funds full and summary prospectus which can be obtained by calling 888-832-4386 or by visiting www.mondrian.com/mutualfunds. Please read the prospectus carefully before investing.

Investing involves risk, including the possible loss of principal. International investments entail risks not ordinarily associated with U.S. investments including fluctuation in currency values, differences in accounting principles, or economic or political instability in other nations. Emerging markets involve heightened risks related to the same factors, as well as increased volatility and lower trading volume. The Fund may invest in derivatives, which are often more volatile than other investments and may magnify the Fund's gains or losses.

Indices are unmanaged and do not include the effect of fees. One cannot invest directly in an index.

The Mondrian Investment Partners Limited Funds are distributed by SEI Investment Distribution Co. (SIDCO). SIDCO is not affiliated with the advisor, Mondrian Investment Partners Limited. Mondrian Investment Partners Limited is Authorized and Regulated by the Financial Conduct Authority.

* As of June, 2021, Mondrian has total assets under management of USD 60.0 billion. In addition, the firm also had USD 4.5 billion of model delivery assets under advisement.

Company Overview

Mondrian is an independent, employee-owned, global value-oriented manager with 30 years' experience in managing a range of equity and fixed income products for a variety of clients based around the World. During this period the business has been managed in a stable, successful fashion, and is controlled by an employee partnership. This ownership structure ensures alignment of interests with clients and reinforces the long-term approach to investment that Mondrian has used since the firm was founded in 1990. Prior to a management buyout in 2004, the business was affiliated with US-based Delaware Investments. Mondrian's value style products have had a track record of producing consistent, strong risk-adjusted performance in a variety of different market environments.

People: Our Best Resource

The most important resource of any investment organization, and Mondrian in particular, is the investment team and staff. Mondrian's investment team has been working together for almost 30 years. We have a low turnover of professional staff, and a strong culture of client service and support.

Philosophy

Mondrian is an active, value-oriented defensive manager. In the management of all equity assets, we invest in securities in which rigorous dividend-discount analysis identifies value in terms of the long-term flow of income. Dividend yield and future real growth play a central role in our decision making process; over time the dividend component will be a meaningful portion of the expected total return.

Our methodology is applied consistently to individual securities across all markets and industries.
