

Mondrian Funds p.l.c.

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Mondrian Global Fixed Income Fund – EUR Unhedged a sub-fund of Mondrian Funds plc - ISIN IE00BNGFS502

Objectives and Investment Policy

The Mondrian Global Fixed Income Fund (the **Fund**) aims to generate current income consistent with the preservation of principal.

The Fund intends to invest primarily in a global portfolio of fixed and/or floating rate debt securities denominated in any currency and issued by governmental and supranational issuers located throughout the world that may provide the potential for capital appreciation. The debt securities the Fund invests in will generally be rated BBB- or better by Standard & Poor's or Baa3 or better by Moody's Investors Service or if unrated, be deemed to be of comparable quality by the Investment Manager. The Fund may invest in a broad range of debt securities, including government, municipal, sovereign and supranational bonds and other debt securities, instruments and obligations issued by governments, their agencies, instrumentalities or political subdivisions and supranational entities. Types of bonds the Fund may invest in but is not limited to are zero coupon bonds and inflation-linked bonds.

A supranational entity is an entity established or financially supported by the national government of one or more countries to promote reconstruction or development. Examples included, among others, the International Bank for Reconstruction and Development (more commonly known as the World Bank) the European Economic Community, the European Investment Bank, the Inter-American Development Bank and the Asian Development Bank. Debt securities of issuers within a given country may be denominated in the currency of such country, the currency of another country or in a multinational currency such as the Euro.

Currency considerations carry a special risk for a portfolio of international debt securities. The Investment Manager primarily uses a purchasing power parity approach to evaluate currency risk. In this

regard, the Fund may carry out hedging activities, and may invest in forward foreign currency contracts to hedge currency risks associated with the purchase of individual securities denominated in a particular currency. The Investment Manager will only carry out such hedging if it is cost effective to do so. The Fund will not automatically hedge positions at portfolio level. Under normal circumstances, where hedging is carried out at portfolio level, it is undertaken defensively back into the base currency of the Fund (Euros), although the Investment Manager may cross-hedge using forward foreign currency contracts.

The Fund's investment performance will be measured against the FTSE World Government Bond Index in Euro terms. In order to seek to take advantage of specific investment opportunities, the Investment Manager has discretion to vary the weightings of bonds to that of the benchmark and invest in bonds which are not included in the benchmark. By way of example, as at 31 December 2020, the Fund's active share (a measure of how the Fund's composition differs from that of the benchmark) was 96.26%.

Any income that may arise in the Fund will be reinvested in the Fund.

You can buy or sell shares daily (but not on weekends or bank holidays in the UK or Ireland). Orders to buy can be made by submitting a request by 5:00p.m. (Irish time), 3 business days in advance, to the administrator. Orders to sell can be made by submitting a request by 5:00p.m. (Irish time), 2 business days in advance to the administrator.

Investment in the Fund may be suitable for investors with a medium to long term investment horizon. For full investment objectives and policy details, please refer to the section entitled "Investment Objectives and Policies of the Funds" in the Supplement to the Prospectus for the Fund.

Risk and Reward Profile

Lower Risk ← **Higher Risk**
Typically lower rewards Typically higher rewards

1	2	3	4	5	6	7
---	---	---	---	---	---	---

As the Fund launched in November 2016, there is insufficient history to provide a useful indication of the risk and reward profile for the Fund. As such, where the available Fund data falls short of 5 years, the indicator shown above uses data from a representative pooled vehicle of the same mandate.

The risk and reward indicator is based on historical data and may not be a reliable indication for the future. The risk and reward category shown is not guaranteed to remain unchanged and may change over time.

The lowest category does not mean that a share class is risk free and your initial investment is not guaranteed. The Fund is in category 3 because of the moderate to low range and frequency of price movements of the underlying investments the Fund invests in. The value of your investment in the Fund may be affected by the following risks:

- As the Fund invests in debt securities (e.g. bonds) it is subject to credit risk (the risk of a bond issuer failing to pay), liquidity risk and interest rate risk (the risk of changes in interest rates).
- The Fund's investments may be in currencies other than the Euro. The impact of this is that as the value of a currency rises or falls it can have a positive or negative impact on the value of the Fund's investments.
- The Fund can invest in financial derivative instruments. These instruments have additional risks such as legal risk or liquidity risk (the inability to sell the contract due to lack of buyers in the market). These risks can have adverse impacts on the overall value of the Fund.
- For a complete overview of all risks attached to this Fund, refer to the section entitled "Risk Factors" in the Fund's Supplement and the Mondrian Funds plc Prospectus.

Charges for this Fund

The charges you pay are used to pay the costs of running the Fund including the marketing and distributing of the Fund. These charges reduce the potential growth of your investment.

One off Charges taken before or after you invest	
Entry Charge	Nil
Exit Charge	Nil
This is the maximum that might be taken out of your money before it is invested (subscription charge) or paid back to you (redemption charge)	
Charges taken from the fund over the year	
Ongoing Charge	0.55%
Charges taken from the fund under certain conditions	
Performance Fee	Nil

The Ongoing Charge does not include Fund transaction costs and may vary from year to year.

The Ongoing Charge is estimated and includes the Management Fee and administrative expenses. The Ongoing Charge includes an administrative expenses cap of 0.10%.

For more information please refer to the section entitled “Fees and Expenses” in the Supplement to the Prospectus for the Fund.

Past Performance

As the share class has recently launched, there is insufficient data to provide a useful indication of past performance to investors.

Practical Information

Depository Northern Trust Fiduciary Services (Ireland) Limited

Umbrella Fund The Fund is a sub-fund of Mondrian Funds plc, an umbrella fund with segregated liability between sub-funds, established as an open ended investment company with variable capital under the laws of Ireland as a public limited company. This means that the assets and liabilities of each sub-fund are segregated by law.
